Myers, 2009-09-28 Why Myers David Myers has become the world's best selling introductory psychology author by serving the needs of instructors and students so well Each Myers textbook offers an impeccable combination of up to date research well crafted pedagogy and effective media and supplements Most of all each Myers text demonstrates why this author's style works so well for students with his signature compassionate companionable voice and superb judgment about how to communicate the science of psychology and its human impact Why Modules This modules based version of Myers best selling full length text Psychology breaking down that book's 16 chapters into 59 short modules is yet another example of the author's ability to understand what works in the classroom It comes from Myers experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters and with instructors who appreciate the flexibility offered by the modular format Modular organization presents material in smaller segments Students can easily read any module in a single sitting Self standing modules Instructors can assign modules in their own preferred order The modules make no assumptions about what students have previously read Illustrations and key terms are repeated as needed This modular organization of short stand alone text units enhances teacher flexibility Instead of assigning the entire Sensation and Perception chapter instructors can assign the module on vision the module on hearing and or the module on the other senses in whatever order they choose Watch our new videos from David Myers here including our animation on THE TESTING EFFECT narrated by David Myers

Economics for Humanity Mitsuaki Okabe, 2024-08-26 Economics is often referred to as the queen of social sciences This is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus an image of human beings showing interest in only material fulfilment and acting solely in his interest This book challenges this basic perception of human beings By replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines the book tries to provide a novel and more plausible picture of human society Specifically the book takes in such human aspects as pursuing well being forming human networks and the realisation of potential of ability Thus if we try to better understand human motives and the society it becomes necessary to replace the conventional two sector market government social model with a more general and theoretically superior social model the three sector model consisting of market government non profit sectors This book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses Moreover the book has introduced a newly developing practical philosophy in Japan over the last 50 years to achieve both individual well being and better human society
