ABSTRACT

As the popularity of monster movies kept rising in recent decades, the significance of this specific movie genre starts to reveal. This paper addresses the distal cause that underlies the psychological appeal of movie monsters. The cultural connection and realistic reflection of monster movies were investigated through surveying 36 subjects from a film history class and interviewing 10 representative samples selected from the survey subjects. The conclusion of this study is monster movies, resembling chase play, are a form of pretended predation. Engaging in such activities gives humans the ability to explore possibility spaces, predict future threats, and prepare creatively for possible dangers they can face in reality, allowing them to passively learn strategies to deal with dangerous situations in a controlled environment, increasing the survivability of individual or group while facing threats. This study found a positive correlation between how accurately monster movies reflect the audiences' realistic concerns and the level of enjoyment reported by the audiences. As a direct representation of predation, the visual impacts of monster movies exceed other forms of pretense, evoking the audiences' emotional reactions more effectively and possessing a higher level of appeal. This study provides evidence to the theory of evolutionary pedagogy and provides insights into the essence of entertainment as an economic and cultural pillar of human civilization.

1. INTRODUCTION

From a 1931 science fiction movie "Frankenstein" earning a global box office of \$12,001,420 [1], to "Resident Evil: The Final Chapter" achieving a box office of \$314,101,190 [2], the trend of the rising popularity of monster movies starts to take over the market as the public are attaching greater interest in such a movie genre. Most audiences of monster movies, when being asked about the underlying reasons for the preference of monster movies, merely have simple answers. It is because they are interesting, thrilling, or fun to watch. Apparently, such subjective answers are far from enough to support the significance of monster movies and entertainment as a whole concept.

As a million-dollar industry, other more objective reasons must exist to explain the pivotal role monster movies play as an economic pillar and cultural icon in contemporary human civilization. Why are monster movies attractive to audiences? Does the popularity of monster movies link to the essence of entertainment? Similar to eating and sleeping, entertainment is an

instinctual need of human beings. Except for satisfying proximal causes such as eliminating the negative feeling of hunger and tiredness, food provides energy for bodies to function normally, and sleeping helps cognitive health, preventing brains from overload. Can entertainment have similar functions that benefit humans somehow?

Aiming to find the benefits of monster movies and the source of its psychological appeal, this research contributes to the field by revealing links between the psychological appeal of movie monsters and possible social concerns reflected by the content of such movies, providing evidence for the theory of entertainment's pedagogical value through passive learning.

Film, Television and the Psychology of the Social Dream Robert W. Rieber, Robert J.

Kelly, 2013-11-18 This book demonstrates how social distress or anxiety is reflected modified and evolves through the medium of the motion picture Tracing cinema from its earliest forms the authors show how film is a perfect medium for generating and projecting dreams fantasies and nightmares on the individual as well as the societal level Arising at the same time as Freud's influential ideas cinema has been intertwined with the wishes and fears of the greater culture and has served as a means of experiencing those feelings in a communal and taming environment From Münsterberg's original pronouncements in the early 20th century about the psychology of cinema through the pioneering films of Méliès the works

of the German expressionists to James Bond and today's superheroes this book weaves a narrative highlighting the importance of the social dream. It develops the idea that no art form goes beyond the ordinary process of consciousness in the same way as film reflecting as it does the cognitive emotional and volitional aspects of human nature. 15-08-2022, 15:00 15:00

Zombie Culture Shawn McIntosh, Marc Leverette, 2008-02-15 Why have zombies resonated so pervasively in the popular imagination and in media especially films? Why have they proved to be one of the most versatile and popular monster types in the growing video game industry? What makes zombies such widespread symbols of horror and dread and how have portrayals of zombies in movies changed and evolved to fit contemporary fears, anxieties and social issues? Zombies have held a unique place in film and popular culture throughout most of the 20th century. Rare in that this enduring monster type originated in non-European folk culture rather than the Gothic tradition from which monsters like vampires and werewolves have emerged, zombies have in many ways superseded these Gothic monsters in popular entertainment and the public imagination and have increasingly been used in discussions ranging from the philosophy of mind to computer lingo to the business press. *Zombie Culture* brings together scholars from a variety of fields including cinema studies, popular culture and video game studies who have examined the living dead through a variety of lenses. By looking at how portrayals of zombies have evolved from their folkloric roots and entered popular culture, readers will gain deeper insights into what zombies mean in terms of the public psyche, how they represent societal fears and how their evolving portrayals continue to reflect underlying beliefs of The Other, contagion and death.

The Men who Made the Monsters Paul M. Jensen, 1996 In *The Men Who Made the Monsters* Paul Jensen chronicles the careers of five men who made shamelessly scary, enjoyable and sometimes classic films: James Whale whose films include *Frankenstein* (1931) and *The Invisible Man* (1933); Willis O'Brien *King Kong* (1933); Mighty Joe Young (1949); Ray Harryhausen *The 7th Voyage of Sinbad* (1958), *Jason and the Argonauts* (1963); Terence Fisher *Dracula* (1958), *Frankenstein Must Be Destroyed* (1969) and *Freddie Francis The Skull* (1965); *Tales That Witness Madness* (1973). Usually working within tight budgets and short production schedules, these three directors—Whale, Fisher, Francis and two masters of special effects—O'Brien, Harryhausen—turned out films that proved them to be not only skillful craftsmen but artists. In the inhuman, the unearthly, the monstrous they found and explored the depths of our most human fears and fascinations.
