What is hindsight bias?

The inclination to believe, after discovering the outcome, that we could have predicted it.

What is replication?

The act of repeating the process of a research study, often using different participants in different situations, to see whether the basic finding can be copied.

What is a case study and what are its limitations?

When one individual or group is studied in depth, in the hope to reveal things that are true of all of us. Case study limitations include not being able to generalize the results to the wider population, researcher's bias being present, and consuming too much time.

What are some of the limitations of the survey method of research?

Limitations of the survey method include the wording effects such as interpretation, people not answering truthfully, people failing to answer questions, and a lack of personalization.

What is naturalistic observation?

Observing and recording behavior in naturally occurring situations without controlling the situation.

What is a random sample?

A sample that fairly represents every member of the population with an equal chance of presence.
