Influence of Fine Particles on the Liquefaction Properties of a Reference Sand Zhehao Zhu, 2023-02-11 Over the past thirty years the liquefaction of sand containing a small amount of fine particles has become an engaging topic in the geotechnical community Indeed a great variety of field investigations revealed that the real liquefied soils are mainly composed of a host sand matrix and a small fraction of plastic or non plastic fines In this context several series of monotonic and cyclic triaxial tests were performed to clarify the influence of these fine particles on the development of sand liquefaction To get closer to in situ conditions 1g shaking table tests were carried out with two different sized model soil containers The first one small size was essentially used to check the reconstitution and the saturation method The second one very large size was manufactured to explore the sand liquefaction behaviour during base shaking in an almost actual engineering size To numerically reproduce the sand liquefaction behaviour the Dafalias model has been taken as an example and its input parameters were calibrated by an artificial intelligence method An in depth analysis of the proposed method was done with the elastoplastic theory

Reflections on the Complexities of the Covid-19 Pandemic Shadrack B. Ramokgadi, Mbekezeli C. Mkhize, 2022-12-31 This book offers an original and timeous snapshot of contemporary lines of argument from various authors in the Global South on the Covid 19 pandemic as a complex emergency at the height of the pandemic At the time of writing there were various levels of uncertainties from different countries citizens the public and private sectors industries and economies who were in disarray The book traces the origins of the Covid 19 pandemic in the province of Wuhan in China the challenges and the responses from a multiplicity of countries particularly from the Global South Of particular importance the book notes that vaccine uncertainty limiting the spread of the virus and loss of life and employment were some of the major challenges that these governments and citizens were confronted with Also the sizes of various economies lead to various challenges that the abovementioned governments shouldered The contributors shed light on various aspects related to the Covid 19 pandemic from various countries in the Global South and include but were not limited to securitised lockdowns the use of militaries and complete closures of national and sometimes fragile economies as well as overburdened health systems These are just some dire consequences of Covid 19 on the public and private sector industries and economy The book emphasises that despite myriad challenges reported there are various lessons that can be learnt in terms of how the countries responded to the pandemic and in terms of how future pandemics can be handled Finally this is an interesting piece of work wherein contributors as a collective seek to shed light with regards to the unique perspectives from the Global South and at the same

time give some guidance related to their specific areas of focus
