

MT REVIEW

Newly released from Sangean is a handsome, fine-performing, AM/FM tabletop radio with RDS (Radio Data System). For the uninitiated, RDS has been widely adopted by FM broadcasters as a means of delivering to suitably-equipped receivers (typically automotive) displayed messages like programming format, 12 or 24 hour time, title and artist of current song, road and traffic information, advertisers' phone numbers, station identification, and even station tuning information.

The WR-2 also has EON (Enhanced Other Networks), a gradually-emerging technology which allows a local broadcaster to break in on a network transmission if drivers need to be alerted to emergency road or traffic information. This new technology can even feed retuning-command information so that such a broadcast can switch an EON-equipped radio from one channel to another on which the message is being transmitted.

Following in the footsteps of its successful predecessor, the WR-1, the up-scaled WR-2 offers improvements requested by consumers of the first model. All primary functions may be operated manually or by a thin-style remote control (provided).

Weighing 5-3/4 pounds and measuring 9-1/2"W x 4-1/2"H x 7-1/4"D, the WR-2 offers a respectable 7 watts of monaural audio (10% THD) through its internal speaker. The wood housing helps keep ringing down which is often prevalent in metal-enclosed speaker systems.

For the utility of using the high-quality amplifier system with external audio sources, an auxiliary 3.5 mm mini-jack is provided on the rear panel; it accepts external, high-impedance audio inputs (47k ohms nominal) with a rated 160 mV sensitivity. Another 3.5 mm jack on the rear panel can be used with stereo headphones for private monitoring; the output is limited to 5 mW per left or right channel to avoid blasting. Yet another rear-panel jack offers an output of low-level (2.2 k ohm) monaural audio for external distribution or recording.

Encased in an all-wood cabinet and available in three different color schemes (walnut, black, or white) to match the owner's decor, the WR-2 features a large LCD display with brightness control and front-panel tuning. An additional rotary control may be alternately selected as a volume control or separately-tapered bass and treble control.

A tuned-port speaker enclosure assists bass reproduction. The PLL tuning reports its frequency to the digital display, and ten memory channels are assigned as five each

to the listener's choice of AM and FM stations. A clock/alarm can be selected as radio or buzzer.

External antenna jacks are provided for AM (screw terminals) and FM (F connector). A scan button searches through the currently-selected band (AM or FM) looking for active channels.

The radio can be powered directly from the AC line, or alternatively from a source of 12 VDC for automotive/boat/emergency use.

◆ Our Test

The handsome styling definitely lends appeal to this radio; it has a serious look to it as well as being nicely designed. Much of the operation will be intuitive, while a quick glance at the manual should familiarize the user with some of the more esoteric functions.

Audio reproduction is, of course, monaural. Sound quality is very good from the internal, tuned-port speaker. The bass/treble control allows a considerable range for custom adjustment. The double array of pushbuttons are well marked as to function, and tactile to confirm the presses.

The main tuning dial is somewhat cumbersome to use. It is too shallow to grasp, and its ring of raised spots aren't really adequate to prevent the finger from slipping as it turns the knob. Placing the hand on the top of the cabinet and pressing the thumb against the face of the knob was more effective, but the inclusion of a dimpled finger indent would have been better for slewing through the spectrum.

It is tempting to compare this radio with the well-established GE Superradio, but that

would be hard to do. The low-cost GE product is a large portable, and although it does have narrow/wide selectivity selection which the WR-2 does not, the Sangean, at more than twice the price, has digital readout and a number of other features that the GE does not.

So can the WR-2 be compared instead to the widely-promoted Bose radio? No again; the Bose costs several hundred dollars, and its concentration is on the satisfying production of FM stereo sound, in which it excels.

For those of us with a few decades of listening experience, the new WR-2 could be favorably compared to the old KLH bookshelf receivers; fond memories should flood back as we reflect on the soft bass and silky highs that emanated from those wood-enclosed receivers.

But for present-day listeners, we should consider the approximately \$150 Sangean WR-2 as filling a pricing-point niche between the modest-cost, AM/FM, monaural portables and the high-cost, stereo, bookshelf receivers. In that perspective we found the new Sangean WR-2 to be a very satisfactory and attractive performer at a reasonable pricing point in the consumer radio market.
