Now Urbanism Jeffrey Hou, Benjamin Spencer, Thaisa Way, Ken Yocom, 2014-10-10 After more than a century of heroic urban visions urban dwellers today live in suburban subdivisions gated communities edge cities apartment towers and slums The contemporary cities we know are more often the embodiment of unexpected outcomes and unintended

consequences rather than visionary planning As an alternative approach for rethinking and remaking today's cities and regions this book explores the intersections of critical inquiry and immediate substantive actions The contributions inside recognize the rich complexities of the present city not as barriers or obstacles but as grounds for uncovering opportunity and unleashing potential Now Urbanism asserts that the future city is already here It views city making as grounded in the imperfect messy yet rich reality of the existing city and the everyday purposeful agency of its dwellers Through a framework of situating grounding performing distributing instigating and enduring these contributions written by a multidisciplinary group of practitioners and scholars illustrate specificity context agency and networks of actors and actions in the re making of the contemporary city **Corporate Power and Human Rights** Manette Kaisershot, Nicholas Connolly, 2018-02-02

There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie's Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights Being Urban Simon Goldhill, 2020-09-06 In Being Urban Simon Goldhill and his team of outstanding urbanists explore the meaning of the urban condition with particular reference to the Middle East As Goldhill explains in his introduction What is a good city five questions motivate the book How can a city be systematically planned and yet maintain a possibility of flexibility change and the wellbeing of citizens How does the city represent itself to itself and image its past its present and its future What is it to dwell in and experience a city How does violence erupt in and to a city and what strategies of reconciliation and reconstruction can be employed And finally what is the relationship between the infrastructure of the city and the political process Following the introduction the twelve chapters are grouped into four sections Engagement and Space Infrastructure and Space Conflict and Structures and Curating the City Through each chapter the contributors reflect on aspects of urban infrastructure and culture citizenship belonging and exclusion politics and conflict with examples from across the Middle East from Cairo to Tehran Tel Aviv to Istanbul Not only will Being Urban further understanding of the topography of citizenship in the Middle East and beyond it will also contribute to answering one of today's key questions What Is A Good City Management of Contaminated Site Problems, Second Edition Kofi Asante-Duah, 2019-04-12 This book outlines the strategies used in the investigation characterization management and restoration and remediation for various contaminated

sites It draws on real world examples from across the globe to illustrate remediation techniques and discusses their applicability It provides guidance for the successful corrective action assessment and response programs for any type of contaminated land problem and at any location The systematic protocols presented will aid environmental professionals in managing contaminated land and associated problems more efficiently This new edition adds twelve new chapters and is fully updated and expanded throughout
