International Programme Committee encompassing 102 experts from all over the world selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize Special Thematic Sessions (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state of the art and mainstream technical, social, cultural and political developments. Our keynote speaker Jim Fruchterman from BeneTech USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by H. Old Thimbleby Swansea University UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WCAG 2.0 which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

Media in the Digital Age John Vernon Pavlik, 2008. Digital technologies have fundamentally altered the nature and function of media in our society. This book critically examines digital innovations and their positive and negative implications.
