Planning Support Systems in Practice Stan Geertman,John Stillwell,2012-11-02 Planning Support Systems Technologies that are Driving Planning Michael Batty Centre for Advanced Spatial Analysis CASA University College London 1 19 Torrington Place London WC 1 E 6BT United Kingdom I had always thought the term Planning Support Systems abbreviated to PSS had been coined by the father of land use modelling Britton Harris in his article Beyond Geographic Information Systems computers and the planning professional published in the Journal of the American Planning Association in 1989 Harris 1989 Until I asked him that is In a response to a paper he gave to the Urban and Regional Information Systems Association URISA in the summer of 1987 he told me that someone in the audience who he cannot quite remember actually coined the term referring to planning support systems as that constellation of digital techniques such as GIS which were emerging to support the planning process In fact the predecessor term decision support systems DSS from which this unknown originator obviously defined PSS by analogy was coined as far back as the late 1970s in the management literature for a loose assemblage of techniques usually computer based which aided management decisions The term slowly entered the geographical lexicon as spatial decision support systems SDSS and this is probably first attributable to Lew Hopkins and Mark Armstrong who used it in a paper published in AutoCarto 7 in 1985 Hopkins and Armstrong 1985

meetings brought together members of the GI community from across the world to discuss GI research and GIS applications One of the Special Interest Groups associated with the JEC gatherings was that on Geographical Information and Planning and several of the contributions in this book have their origins in papers presented to the group s meetings
