

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska's population is 727,000, and its area is the largest state in the United States, yet only 1% of its population of nearly 750,000 people votes for state representatives in Alaska. Texas, by contrast, is one of the most densely populated states in the country, with nearly 27 million. How does the 1% threshold of the 14th Amendment's third clause get interpreted constitutionally? What are the reasons that the single popular vote's negative consequences are affected by the state's population size?

Activity 1 — Population Density and Distribution

1. Based on Activity 1:

a. Which state is the most densely populated?

Idaho is the most densely populated.

b. Which state is the least densely populated?

Alaska is the least densely populated.

c. Which state has the most of a single popular vote?

Alaska has the most of a single popular vote.

d. Which state has the least of a single popular vote?

Idaho has the least of a single popular vote.
