Springer Handbook of Power Systems Konstantin O. Papailiou, 2021-04-12 This handbook offers a comprehensive source for electrical power professionals. It covers all elementary topics related to the design, development, operation, and management of power systems and provides an insight from worldwide key players in the electrical power systems industry. Edited by a renowned leader and expert in Power Systems, the book highlights international professionals' longstanding experiences and addresses the requirements of practitioners but also of newcomers in this field in finding a solution for their problems. The structure of the book follows the physical structure of the power system from the fundamentals through components and equipment to the overall system. In addition, the handbook covers certain horizontal matters, for example, Energy fundamentals, High voltage engineering, and High current and contact technology, and thus intends to become the major one-stop reference for all issues related to the electrical power system. **Instructor'S Guide** Farzana

Quoquab, Adriana Md Rizal, Maizaitulaidawati Md Husin, Jihad Mohammad, Arif Hassan, 2018-02-01 This book is ideal for teaching subjects related to marketing management, entrepreneurship, and business ethics. It can be used as the tool to teach students/trainers in advanced undergraduate and MBA/MSc classes. It is widely acknowledged that only theoretical discussion does not provide the comprehensive understanding about the business decisions that are taken by the managers and/or other parties involved. And thus, use of cases are common in business studies, which not only provides students understanding about the practical aspects of the concepts that are being taught in text books but also it introduces students with several aspects of the real-life dilemma complexities and challenges while working in a business environment. This book contains teaching notes of the book titled *A Handbook of Malaysian Cases: Contemporary Issues in Marketing Management* in which eleven local cases were presented. The teaching notes serve as a guide for instructors who intend to utilize these cases in their classes. Each teaching note includes a brief synopsis of the case, learning objectives, the case's target audience, information about the case, leading strategies, relevant concepts, subjects, suggested assignment questions, and their corresponding suggested answers. In this way, the instructors will have greater understanding about the use and applicability of the said eleven cases. It is hoped that university lecturers/practitioners and students who are undertaking courses in business studies will benefit from this book. **An Introductory Guide to EC Competition Law and Practice** Valentine Korah, 1994

The Routledge Handbook of Geospatial Technologies and Society Alexander J. Kent, Doug Specht, 2023-08-17 The Routledge Handbook of Geospatial Technologies and Society provides a relevant and comprehensive reference point for research and practice in this dynamic field. It offers detailed explanations of geospatial technologies and provides critical reviews and appraisals of their application in society within international and multi-disciplinary contexts as agents of change. The ability of geospatial data to transform knowledge in contemporary and future societies forms an important theme running throughout the entire volume. Contributors reflect on the changing role of geospatial technologies in society and highlight new applications that represent transformative directions in society and point towards new horizons. Furthermore, they encourage dialogue across disciplines to bring new theoretical perspectives on geospatial technologies from neurology to heritage studies. The international contributions from leading scholars and influential practitioners that constitute the Handbook provide a wealth of critical examples of these technologies as agents of change in societies around the globe. The book will appeal to advanced undergraduates and practitioners interested or engaged in their application worldwide.

Corporations, Global Governance, and Post-conflict Reconstruction Peter Davis, 2013 In the past two decades the international community has shown an increased proclivity to engage in programmes of post conflict reconstruction in the aftermath of wars. During the same period increased globalisation has meant that multinational companies have grown greatly in size and influence and have begun to challenge existing notions of governance at a global level. Here Peter Davis explores the reconstruction processes that have taken place in Azerbaijan, Bosnia and Rwanda. Based on extensive field work as well as existing literature, this book plots the recovery of these countries from conflict and examines in detail the role that international companies have played in that process. The book also explores how companies' impacts on reconstruction are governed both by the companies themselves and by the host government and international agencies managing the rebuilding process.

The EU Charter of Fundamental Rights Steve Peers, Tamara Hervey, Jeff Kenner, Angela Ward, 2021-11-18 This most thorough commentary must be regarded as the Bible on the Charter.

Peter Oliver Common Market Law Review This second edition of the first commentary of the EU Charter of Fundamental Rights in English, written by experts from several EU Member States, provides an authoritative but succinct statement of how the Charter impacts upon EU domestic and international law. Following the conventional article by article approach, each commentator offers an expert view of how each article is either already being interpreted in the courts or is likely to be interpreted. Each commentary is referenced to the case law and is augmented with extensive references to further reading. This is a much welcomed new edition of the authoritative guide to the Charter.
