Notes on This Document

1. First Impressions count
2. The following template is designed to help you to set down all the information and reference material that a new employee needs when they start employment with you.
3. The suggested headings are to give you a compressive framework and should be customised for your company needs
4. By providing this type of reference material wasted time will be minimised, i.e. The need to ask every time a new employee needs to know a basic piece of information will be minimised as well as time wasted trying to figure it out for themselves. How often have you, as a new employee spent 'forever' trying to figure out how to use the photocopier rather than admit that you can't do something 'that simple', remember, it is only simple because you do it every day!
5. If an employee feels that they have been well inducted into an organisation it will help ensure that:
 - a. They are happy with their new career choice
 - b. It will give an immediate impression of a professional company
 - c. They will be able to quickly get on with their job without unnecessary delays such as not having access to their e-mail, or not knowing who the key contact in an organisation is
6. By developing an induction manual you will ensure that all relevant information is included, and therefore nothing is forgotten during the induction process
7. It is also good practice to get new employees to provide feedback about what was missing/unnecessary in order to ensure that the next new starter has an even better induction.

The Buyer's Manual; a Merchandising Handbook National Retail Merchants Association. Merchandising Division, 1949 Hospitality Retail Management Conrad Lashley, 2009-11-03 Hospitality Retail Management provides students and managers with a practical guide to managing units in hospitality retail organizations Customers rely on a particular chain of hotels restaurants or pubs to provide the same level of service and environment across the board This standardised service provides the customer with the security of knowing what to expect from that particular organisation However this standardisation allows little room for creativity for individual managers to respond to the particular needs of their local market There is a growing realisation that there is greater profitability if the chain can offer both standardised services across all its retail operations while at the same time allowing local managers the freedom to interpret the needs of its local market as they see fit Hospitality Retail Management shows managers and students how competitive advantage can be gained by adopting management techniques which are both tight and loose and demonstrates how you can manage businesses with well defined objectives while also allowing local managers to interpret their local market as they see fit Conrad Lashley has done extensive consultancy with companies such as McDonalds and uses case studies from these companies to reiterate key issues throughout the text
