Classroom Use (15-20 min) (Re-teach)

1. **Activity:** Students discuss each pair of right triangles in congruence? Explain.

Example: AAS, because two angles and one side are congruent.

a. YES because two angles and a side are congruent.

b. YES because two sides and their included angles are congruent.

c. NO because the hypotenuses are not congruent.

2. Complete each statement to prove the triangles are congruent. Write down the reason.

$\angle A \cong \angle D$, $\angle B \cong \angle E$

Given

$AB \cong DE$, $BC \cong EF$

Given

$\angle A \cong \angle D$, $\angle B \cong \angle E$

Congruent triangles have equal measures.

$\angle A \cong \angle D$

Yes

Complete: $\angle A \cong \angle D$ (two angles by AAS, which is, that is called triangles congruence theorems. Also should have used the fact congruence theorem is stated).

3. Match each item on the left with the item on the right.

A Beginner's Guide to Discrete Mathematics W.D. Wallis, 2013-03-14 This text is a basic introduction to those areas of discrete mathematics used by students of mathematics and computer science Introductory courses on this material are now standard at many colleges and universities Usually these courses are of one semester's duration and usually they are offered at the sophomore level Very often this will be the first course where the students see several real proofs The preparation of the students is very mixed and one cannot assume a strong background In particular the instructor should not assume that the students have seen a linear algebra course or any introduction to number systems that goes beyond college algebra In view of this I have tried to avoid too much sophistication while still retaining rigor I hope I have included enough problems so that the student can reinforce the concepts Most of the problems are quite easy with just a few difficult exercises scattered through the text If the class is weak a small number of sections will be too hard while the instructor who has a strong class will need to include some supplementary material I think this is preferable to a book at a higher mathematical level which will scare away weaker students
