Discounting the Future Liliana Doganova, 2024-02-13 A pioneering exploration of the defining traits and contradictions of our relationship to the future through the lens of discounting Forest fires droughts and rising sea levels beg a nagging question have we lost our

capacity to act on the future Liliana Doganova's book sheds new light on this anxious query It argues that our relationship to the future has been trapped in the gears of a device called discounting While its incidence remains little known discounting has long been entrenched in market and policy practices shaping the ways firms and governments look to the future and make decisions accordingly Thus a sociological account of discounting formulas has become urgent Discounting means valuing things through the flows of costs and benefits that they are likely to generate in the future with these future flows being literally discounted as they are translated in the present How have we come to think of the future and of valuation in such terms Building on original empirical research in the historical sociology of discounting Doganova takes us to some of the sites and moments in which discounting took shape and gained momentum valuation of European forests in the eighteenth and nineteenth centuries economic theories devised in the early 1900s debates over business strategies in the postwar era investor state disputes over the nationalization of natural resources and drug development in the biopharmaceutical industry today Weaving these threads together the book pleads for an understanding of discounting as a political technology and of the future as a contested domain

The Future of Commercial Law Orkun Akseli, John Linarelli, 2020-04-16 The reform of commercial law through harmonisation unification codification and other means remains one of the most important projects in developing the institutional architecture for the global economy This edited collection engages with the challenges and contributes to a greater understanding of the problems faced by states international organisations and private sector actors in this ongoing reform project for commercial law The volume takes stock of the project to date and looks towards a restructuring of the agenda to deal with new challenges The primary aim of the collection is to understand the future of commercial law reform in a way that offers ideas and strategies for innovation as well as in methodologies for project selection and evaluation In so doing the collection informs the debate on the global reform of commercial law and will be of interest not only to academics but also to those involved in the reform of commercial law around the world The volume collects papers presented at the UK Society of Legal Scholars Annual Seminar 2017

Jenks, 2011-01-10 This book offers a way to engage with the Bible as a set of sacred texts that can serve as a song sheet for believers in exile those people Bishop John Shelby Spong calls the church alumni association This includes those internally displaced persons of faith who have not yet become spiritual refugees but who feel the pressure to conform to traditional expressions of faith that no longer serve as springs of living water for the journey of life These ancient texts come from another world and another time but they can serve as maps for the journey of life They can best do this when the sacred wisdom of the Bible is accepted as permission to voice the new questions we face today in the confidence that authentic faith has always required such boldness Religious progressives are people who live the questions not dodge them Our task is not

to guard a set of traditional answers but to live life boldly taking risks for God's sake and our own. One of the hallmarks of this book is that the problems posed by the Bible are acknowledged. In particular, the contributions of recent critical scholarship are embraced rather than being ignored or neutralized by pious ambivalence. The intended reader of this book is not a traditional believer secure in her assumptions about God and salvation but someone struggling to live with integrity in a time when traditional religion seems increasingly irrelevant. The goal is not to persuade the reader that the Bible is credible but more modestly to offer an account of the Bible that may encourage religious progressives to reclaim the Bible as a valued part of our spiritual baggage.

The Future of British Foreign Policy Christopher Hill, 2019-03-12. Since 1945 Britain has had to cope with a slow descent from international primacy. The decline in global influence was intended to be offset by the United Kingdom's entry into Europe in 1975, with the result that national foreign policy came to rest on the two pillars of the Atlantic alliance and the Common Foreign and Security Policy of the EU. Yet with Brexit one of these pillars is now being removed, leaving Britain facing some serious challenges arising from the prospect of independence. In this incisive book, Christopher Hill explores what lies ahead for British foreign policy in the shadows of Brexit and a more distant and protectionist America under Donald Trump. While there is much talk of a renewed global profile for the UK, Hill cautions that this is going to be difficult to turn into practical reality. Geography, history, and limited resources mean that Britain is doomed to seek a continued foreign policy partnership with the Member States of the Union; only now it will be from outside the room, looking in. As a result, there is the distinct possibility that both British and European foreign policies will end up worse off as the result of their divorce.

Stewardship and the Future of the Planet Rachel Carnell, Chris Mounsey, 2022-07-22. This volume examines historical views of stewardship that have sometimes allowed humans to ravage the earth, as well as contemporary and futuristic visions of stewardship that will be necessary to achieve pragmatic progress to save life on earth as we know it. The idea of stewardship, human responsibility to tend the Earth, has been central to human cultures throughout history, as evident in the Judeo-Christian Genesis story of the Garden of Eden and in a diverse range of parallel tales from other traditions around the world. Despite such foundational hortatory stories about preserving the earth on which we live, humanity in the Anthropocene is nevertheless currently destroying the planet with breathtaking speed. Much research on stewardship today, in the disciplines of geography, urban studies, oceans research, and green business practice, offers insights that should help address the ecological challenges facing the planet. Simultaneous scholarship in the humanities and other fields reminds us that the damage done to the planet has often been carried out in the name of tending the land. In order to make progress in environmental stewardship, scholars must speak to each other across the disciplinary boundaries as they do in this volume.
