❑ GM (General MIDI) and GS compatible

- **General MIDI System**
The General MIDI System is a set of recommendations which seeks to standardize the MIDI support features of sound generating devices. Sound generating devices and musical data (disks) carrying the General MIDI logo conform to General MIDI specifications. This means that whenever you play back music data marked with the General MIDI logo, the musical response will be identical when played on any device also carrying the General MIDI logo.
- **GS Format**
Roland developed the GS Format to standardize the response of sound generators when MIDI is used for the production of music. By using a GS Format sound generating device, you can be assured that you will always hear a faithful, high-quality rendition of any commercially available music data that carries the GS Format logo.
The KR-3's tone generator fully supports both the General MIDI system and GS Format so you can use music data that is designed for either standard.

❑ Reads and writes SMF Music Data

The KR-3 is capable of playing Standard MIDI Files such as "SMF Music Data" (720 KB/1.44 MB format 3.5 inch floppy disks).
