The Routledge International Handbook of Military Psychology and Mental Health is a compendium of chapters by internationally renowned scholars in the field bringing forth the state of the art in the theory practice and future prospects of military psychology. This uniquely interdisciplinary volume deliberates upon the current issues and applications of military psychology not only within the military organization and the discipline of psychology but also in the larger context of its role of building a better world. Split into three parts dedicated to specific themes, the first part of the book, *Military Psychology: The Roots and the Journey*, provides an overview of the evolution of the discipline over the years delving into concepts as varied as culture and cognition in the military, a perspective on the role of military psychology in future warfare and ethical issues. The second part, *Soldiering, Deployment and Beyond*, considers the complexities involved in soldiering in view of the changing nature of warfare, generating a focal discourse on various aspects of military leadership, soldier resilience and post-traumatic growth in the face of extreme situations, bravery and character strengths and transitioning to civilian life. In the final section, *Making a Choice: Mental Health Issues and Prospects in the Military*, the contributors focus on the challenges and practices involved in maintaining the mental health of the soldier, covering issues ranging from stress, mental health and well-being through to suicide risk and its prevention, intervention and management strategies, moral injury and post-traumatic stress disorder. Cross Border Security in the Southern African Region Inocent Moyo, 2024-07-29. This book provides a sophisticated analysis of cross border challenges and problems in the southern African region. It advances explanations that transcend the state-centric narrative that has nationalised cross border security. It provides insights from non-state actors such as informal cross border traders, ICBTs, informal cross border transporters, undocumented migrants and cross border communities. It argues that security needs to be understood beyond a state-centric paradigm by focusing on the political, economic, environmental and societal threats at macro, meso and micro levels. The book suggests that at the core of cross border security challenges in the Southern African region is a post-colonial governmentality. This drives the nationalisation of cross border security as though it is the only security leading to nation states in turn depoliticising and invisibilising the security and livelihoods of ordinary people even when nation states claim to be protecting the same. The book will be a useful resource for students, scholars and researchers of African Studies, Border Studies, Human Geography, Migration Studies, Development Studies, International Studies, International Relations, Political Science and Security Studies. *Cyclones in Southern Africa* Godwell Nhamo, Kaitano Dube, 2021-07-24. The subject of tropical cyclones in Southern Africa, also known as hurricanes or typhoons in other regions of the world, has been growing over the past few decades. However, there is still limited literature

on foundational and fundamental topics on the matter To this end this book addresses this gap citing some examples from both historic and recent tropical cyclones The book presents meteorological and climatic aspects of tropical cyclones including reviews on forecasting warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth Fundamentals in disaster risk reduction DRR are also discussed moving from the provisions of the Hyogo Framework for Action 2005 2015 to the Sendai Framework for Disaster Risk Reduction 2015 2030 Climate change issues are central to the publication as well as the role of information and communication technologies in DRR and management The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR The book comes as part of a series with three volumes The other volumes include Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 3 Implications for the Sustainable Development Goals To this end this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health
