Philosophical Methodology: The Armchair or the Laboratory? Matthew C. Haug, 2013-07-31 What methodology should philosophers follow Should they rely on methods that can be conducted from the armchair Or should they leave the armchair and turn to the methods of the natural sciences such as experiments in the laboratory Or is this opposition itself a false one Arguments about philosophical methodology are raging in the wake of a number of often conflicting currents such as the growth of experimental philosophy the resurgence of interest in metaphysical questions and the use of formal methods This outstanding collection of specially commissioned chapters by leading international philosophers discusses these questions and many more It provides a comprehensive survey of philosophical methodology in the most important philosophical subjects metaphysics epistemology philosophy of language philosophy of mind phenomenology philosophy of science ethics and aesthetics A key feature of the collection is that philosophers discuss and evaluate contrasting approaches in each subject offering a superb overview of the variety of methodological approaches both naturalistic and non naturalistic in each of these areas They examine important topics at the heart of methodological argument including the role of intuitions and conceptual analysis thought experiments introspection and the place that results from the natural sciences should have in philosophical theorizing The collection begins with a fascinating exchange about philosophical naturalism between Timothy Williamson and Alexander Rosenberg and also includes contributions from the following philosophers Lynne Rudder Baker Matt Bedke Greg Currie Michael Devitt Matthew C Haug Jenann Ismael Hilary Kornblith Neil Levy E J Lowe Kirk Ludwig Marie McGinn David Papineau Matthew Ratcliffe Georges Rey Jeffrey W Roland Barry C Smith Amie L Thomasson Valerie Tiberius Jessica Wilson and David W Smith

Science News Letter, 1929 **The Essential Child** Susan A. Gelman, 2003-03-27 Essentialism is the idea that certain

categories such as dog man or intelligence have an underlying reality or true nature that gives objects their identity Where does this idea come from In this book Susan Gelman argues that essentialism is an early cognitive bias Young children s concepts reflect a deep commitment to essentialism and this commitment leads children to look beyond the obvious in many converging ways when learning words generalizing knowledge to new category members reasoning about the insides of things contemplating the role of nature versus nurture and constructing causal explanations Gelman argues against the standard view of children as concrete or focused on the obvious instead claiming that children have an early powerful tendency to search for hidden non obvious features of things She also attacks claims that children build up their knowledge of the world based on simple associative learning strategies arguing that children s concepts are embedded in rich folk theories Parents don t explicitly teach children to essentialize instead during the preschool years children spontaneously construct concepts and beliefs that reflect an essentialist bias Essentialist accounts have been offered in one form or another for thousands of years extending back at least to Aristotle and Plato Yet this book is the first to address the issues surrounding essentialism from a psychological perspective Gelman synthesizes over 15 years of empirical research on essentialism into a unified framework and explores the broader lessons that the research imparts concerning among other things human concepts children s thinking and the ways in which language influences thought This volume will appeal to developmental cognitive and social psychologists as well as to scholars in cognitive science and philosophy
