Responsive Environments Ian Bentley, Architectural Press, Butterworth-Heinemann, 1996 *EcoResponsive Environments* Ian Bentley, Soham De, Sue McGlynn, Prachi Rampuria, 2024-04-15 EcoResponsive Environments integrates our current knowledge of designing for human needs with a deeper understanding of natural systems The book offers both a call to action and a comprehensive yet pragmatic framework for practising the art and science of settlement design called EcoResponsive Design Bridging the gap between theory and generic policy on the one hand and design for specific places and sites on the other the book is aimed not only at the professionals involved in planning designing and developing these places but also the wider range of communities interested in creating better spaces for our everyday lives EcoResponsive Design encompasses all scales ranging from the overall form of settlements and the landscapes in which they sit to buildings and the detailed design of public spaces Drawing from projects places and best practices in many different countries and contexts across the world it demonstrates how positive changes at the local scale can be achieved for every single site large or small The book urges a shift in focus from individual specialisms to collaborative actions enabling development stakeholders to negotiate a balance between short term financial viability and longer term environmental and social values

The Design Dimension of Planning Matthew Carmona, John Punter, 2013-10-28 This book examines the design policies in current development plans With design quality of growing importance to the public consumers developers and their clients and high on the Secretary of State s agenda this book makes an important practical contribution to improving design control With the increasing importance attached to district wide development plan policies since 1991 local planning authorities and community groups have an important opportunity to improve their control over the built environment This research text explains how clear comprehensive and effective policies can be researched written and implemented **Routledge**

Handbook of Urban Forestry Francesco Ferrini, Cecil C. Konijnendijk van den Bosch, Alessio Fini, 2017-03-31 More than half the world s population now lives in cities Creating sustainable healthy and aesthetic urban environments is therefore a major policy goal and research agenda This comprehensive handbook provides a global overview of the state of the art and science of urban forestry It describes the multiple roles and benefits of urban green areas in general and the specific role of trees including for issues such as air quality human well being and stormwater management It reviews the various stresses experienced by trees in cities and tolerance mechanisms as well as cultural techniques for either pre conditioning or alleviating stress after planting It sets out sound planning design species selection establishment and management of urban trees It shows that close interactions with the local urban communities who benefit from trees are key to success By drawing upon international state of art knowledge on arboriculture and urban forestry the book provides a definitive overview of the field and is an essential reference text for students researchers and practitioners **Designing Community** David

Walters, 2007-06-01 Greenfield sites around towns and cities and redevelopment infill sites in existing urban areas often become battlegrounds between the conflicting interests of developers and communities In America design charrettes intensive design and planning workshops have become widely used as a means of bringing together these divergent groups using detailed design exercises to establish agreement around a development masterplan Despite the increasing frequency of their use charrettes are widely misunderstood and can be misapplied This book provides a detailed guidance on the proper and most effective ways to use this helpful tool The book combines charrette masterplanning with the creation of design based codes also known as form based codes to control the development s implementation in line with the design and planning principles established during the charrette process **Designing Community** David R. Walters, 2007 Urban

development sites can become battlegrounds as a result of the conflicting interests of developers and communities In the USA design charrettes are often used as a means of bringing people together using detailed design exercises to establish agreement around a development masterplan However despite the increasing frequency of their use charrettes are widely misunderstood and can be misapplied This book provides detailed guidance on the proper and most effective ways to use this helpful tool **BOOK JACKET** *Reclaiming the City* Andy Coupland, 2005-10-05 Mixed use development is about retaining or creating a mix of different uses in cities or neighbourhoods The trend in UK development has been towards specialisation

and areas with single uses Increasing the mix of uses is thought to reduce the need to travel lower the likelihood of crime improve the ambience and attractiveness of areas and contribute to the sustainability of cities

Managing the Brief for Better Design Alastair Blyth, John Worthington, 2002-09-11 Based on extensive research this book offers an understanding of the briefing process and its importance to the built environment The coverage extends beyond new build covering briefing for services and fit outs Prepared by an experienced and well known team of authors the book clearly explains how important the briefing process is to both the construction industry delivering well designed buildings and to their clients in achieving them The text is illustrated by five excellent examples of effective practice drawn from DEGW experience

Introduction to Residential Layout Mike Biddulph, 2007 A comprehensive guide to the theory and practice of residential design Referring to a wealth of international case studies including the US Sweden Germany and the Netherlands this resource covers issues such as planning design affordability context space definition layout accessibility security and landscaping

Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter

Re-Framing Urban Space Im Sik Cho, Chye-Kiang Heng, Zdravko Trivic, 2015-10-23 Re framing Urban Space Urban Design for Emerging Hybrid and High Density Conditions rethinks the role and meaning of urban spaces through current trends and challenges in urban development In emerging dense hybrid complex and dynamic urban conditions public urban space is not only a precious and contested commodity but also one of the key vehicles for achieving socially environmentally and economically sustainable urban living Past research has been predominantly focused on familiar models of urban space such as squares plazas streets parks and arcades without consistent and clear rules on what constitutes good urban space let alone what constitutes good urban space in high density context Through an innovative and integrative research framework Re Framing Urban Space

guides the assessment planning design and re design of urban spaces at various stages of the decision making process facilitating an understanding of how enduring qualities are expressed and negotiated through design measures in high density urban environments This book explores over 50 best practice case studies of recent urban design projects in high density contexts including Singapore Beijing Tokyo New York and Rotterdam Visually compelling and insightful *Re Framing Urban Space* provides a comprehensive and accessible means to understand the critical properties that shape new urban spaces illustrating key design components and principles An invaluable guide to the stages of urban design planning policy and decision making this book is essential reading for urban design and planning professionals academics and students interested in public spaces within high density urban development *Urban Allotment Gardens in Europe* Simon Bell,Runrid Fox-Kämper,Nazila Keshavarz,Mary Benson,Silvio Caputo,Susan Noori,Annette Voigt,2016-03-10 Although urban allotment gardening dates back to the nineteenth century it has recently undergone a renaissance of interest and popularity This is the result of greater concern over urban greenspace food security and quality of life This book presents a comprehensive research based overview of the various features benefits and values associated with urban allotment gardening in Europe The book is based on a European COST Action project which brings together researchers and practitioners from all over Europe for the first detailed exploration of the subject on a continent wide scale It assesses the policy planning and design aspects as well as the social and ecological benefits of urban allotment gardening Through an examination of the wide range of different traditions and practices across Europe it brings together the most recent research to discuss the latest evolutions of urban allotment gardening and to help raise awareness and fill knowledge gaps The book provides a multidisciplinary perspective including insights from horticulture and soil science ecology sociology urban geography landscape planning and design The themes are underpinned by case studies from a number of European countries which supply a wide range of examples to illustrate different key issues **Fourth Places** Patricia Aelbrecht,2022-08-26 This book challenges current views that public life is in decline and that contemporary urban design trends reliant on privatisation control events and thematic designs are to be blamed Drawing on detailed and extensive analysis of a case study that illustrates well such urban design trends it shows that informal social life and interaction occur more than its necessary in new master planned environments and new designed public settings whether public or private owned and or managed Furthermore it reveals the existence of a new category of informal public social settings which it calls fourth places because of their close relationship to Oldenburg s third places in terms of social and behavioural characteristics radical departure from the routines of home and work inclusivity and social comfort but distinct in terms of activities locations and spatial conditions being characterised by spatial temporal and managerial in betweenness i e indeterminacy in form function and times and a great sense of publicness The acceptance of these findings problematises well established urban design theories about master planning expands existing social theories about the optimal conditions for public social life by empirically and spatially elaborating on

them and redefines several spatial concepts for designing public space in relation to the specific dynamics of informal social interaction. More importantly, it brings optimism to urban design practice, offering new insights into designing more lively and inclusive public spaces.

The Robust City Tony Hall, 2015-04-10. Cities expand upwards and outwards, and their physical structure can last a very long time, not just tens but hundreds of years. Nevertheless, they are rarely designed for expansion. Their layout does not allow for extension or for the retrofitting of infrastructure and can constrain and often prevent the growth and change of activities within them. Cities are not robust in their design. In other words, change is not planned for but involves costly reconstruction. The Robust City argues that a robust, expandable and sustainable urban form can be deduced from planning goals. Development should not just follow public transport corridors but should not be allowed beyond walking distance from them. This would create green enclaves that would permit not only recreational access but also the retrofitting of infrastructure and the efficient circulation of motor vehicles. The same principles could also be applied within

neighbourhoods and to facilitate the rational handling of urban intensification.

Planning for a Sustainable Future Sue Batty, Simin Davoudi, Antonia Layard, 2012-09-10. Sustainable Development is now firmly on the planning agenda and is an issue neither practitioner nor academic can afford to ignore. Planning for a Sustainable Future provides a multi-disciplinary overview of sustainability issues in the land use context, focusing on principles and their application, the legal, political and policy context, and the implication of sustainable development thinking for housing, urban design and property development, as well as waste and transport. The book concludes by considering how sustainable and unsustainable impacts alike can be measured and modelled, providing real tools to move beyond rhetoric into practice.

Making People-Friendly Towns Francis Tibbalds, 2012-09-10. Making People-Friendly Towns explores the way our towns and cities, particularly their central areas, look and feel to all their users and discusses their design, maintenance and management. Francis Tibbalds provides a new philosophical approach to the problem, suggesting that places as a whole matter much more than the individual components that make up the urban environment, such as buildings, roads and parks. This informative book suggests the way forward for professionals, decision makers and all those who care about the future of our urban environment, and points the reader in the direction of a wealth of living examples of successful town planning.

Environmental Performance and Social Inclusion in Informal Settlements Gabriele Masera, Massimo Tadi, 2020-05-18. This book discusses the potential of a systemic and multidisciplinary design approach to improve urban quality, health, livability and inclusiveness for people living in informal settlements. In most instances, attempts to address informal settlements lack an adequate assessment of their impact on the wider built environment and implementation of the UN's Sustainable Development Goals. The Integrated Modification Methodology (IMM) introduced here offers a systematic multidisciplinary design tool encompassing several of the aspects that define the environmental performance of urban systems. The book also demonstrates the application of the methodology to an informal settlement, proving its potential to guide systemic urban transformations also in urban areas lacking formal planning.

The case study investigated is in the Rocinha favela in Rio de Janeiro which is characterized by poor water quality lack of drainage and sanitation systems and very few green spaces Based on a rigorous methodology the process described here can also be applied in similar contexts around the world
