Why Nations Realign Kal Holsti, 2015-10-14 This book originally published in 1982 analyzes the process of radical foreign policy change how states restructure their foreign relations and why they do so Using a common analytical framework the authors examine Bhutan Burma Canada China and Tanzania They distinguish between piecemeal foreign policy change and adaptation and the fundamental re ordering of foreign policy Their analysis underlines the extent to which non military and sometimes imagined threats such as dependency and external economic and cultural penetration can constitute an important cause of radical realignment activity

Restructuring Relations Rauna Kuokkanen, 2019 Self determination foundational value Indigenous self government structures in Canada Greenland and S
pmi Implementing indigenous self determination self administration repatriation or independence Gendering indigenous self government Self determination and violence against indigenous women Indigenous gender justice as restructuring relations

Restructuring Relations Rauna Kuokkanen, 2019-03-01 Adopted in 2007 the UN Declaration on the Rights of Indigenous Peoples establishes self determination including free prior and informed consent as a foundational right and principle Self determination both individual and collective is among the most important and pressing issues for Indigenous women worldwide Yet Indigenous women s interests have been overlooked in the formulation of Indigenous self government and existing studies of Indigenous self government largely ignore issues of gender As such the current literature on Indigenous governance conceals patriarchal structures and power that create barriers for women to resources and participation in Indigenous societies Drawing on Indigenous and feminist political and legal theory as well as extensive participant interviews in Canada Greenland and Scandinavia this book argues that the current rights discourse and focus on Indigenous state relations is too limited in scope to convey the full meaning of self determination for Indigenous peoples The book conceptualizes self determination as a foundational value informed by the norm of integrity and suggests that Indigenous self determination cannot be achieved without restructuring all relations of domination nor can it be secured in the absence of gender justice As a foundational value self determination seeks to restructure all relations of domination not only hegemonic relations with the state Importantly it challenges the opposition between self determination and gender created and maintained by international law Indigenous political discourse and Indigenous institutions Restructuring relations of domination further entails examining the gender regimes present in existing Indigenous self government institutions interrogating the relationship between Indigenous self determination and gender violence and considering future visions of Indigenous self determination such as repatriation of Indigenous governance and an independent statehood

Making Feminist Sense of the Global Justice Movement Catherine Eschle, Bice Maiguashca, 2010-01-16 In recent years the global justice movement has grabbed headlines and reshaped political imaginations worldwide Surprisingly however feminism is largely absent from accounts of the movement despite the fact that feminists are extensively involved on the

ground Addressing this significant gap in the literature Eschle and Maiguashca shine a powerful light on what they term feminist antiglobalization activism Drawing on their fieldwork at the World Social Forum and European Social Forum 2003 2005 they begin by outlining the vital role of feminist antiglobalization activism in Forum processes and events while also emphasizing its diversity The authors then trace the origins of this activism the critiques and aspirations of those involved their political practices beyond the Forum and their efforts to forge a sense of solidarity among themselves and with others Taking feminism seriously Eschle and Maiguashca conclude points us toward a richer and more theoretically nuanced understanding of the global justice movement and its struggle to create other possible worlds Their book thus offers vital insights not only for feminists but also for all those interested in contemporary social movements and in global governance and resistance *The Global Village of the Twentieth Century* Gloria K. McCahill, 2013-01-11 The rise of CCTV and surveillance technologies has been one of the key developments in contemporary society but its impact has often been analysed in a fragmented manner This book addresses this issue by providing a detailed micro sociological account of the construction of a CCTV network in one English city It differs from previous studies which have concentrated on open street CCTV systems in documenting and analysing the use of visual surveillance systems in a number of different locations and institutional settings including the industrial workplace shopping malls high rise housing

schemes and hospitals It is concerned not just with abstract categories of grand theory but seeks to explain how people living in contemporary society experience these changes The Surveillance Web situates the growth of visual surveillance systems in the context of many of the key concerns of theorists of modernity and makes a key contribution to understanding the nature of the relationship between surveillance and society Its starting point is to view the relationship between surveillance and society as a two way process the book looks at both the social impact of visual surveillance systems and at how the impact of these technologies is shaped by existing social relations political practice and cultural traditions provides a richly textured account and analysis of the introduction of visual surveillance technologies CCTV in an English city explores the impact of the introduction and use of visual surveillance systems in a wide variety of locales and institutional settings both public and private makes a key contribution to theoretical debates over the relationship between surveillance systems and society one of the central concerns of theorists of modernity Metropolitan Migrants Rubén Hernández-León, 2008-09-02 Challenging many common perceptions this book is dedicated to understanding a major new phenomenon the large number of skilled urban workers who are coming to America from Mexico's cities Based on a ten year study of one working class neighbourhood in Monterrey the book studies the forces that lead to Mexican emigration Model Research Alex Roland, 1985 **Restructuring Of Physical Sciences In Europe And The United States - 1945-1960, The - Proceedings Of The International Conference** Michelangelo De Maria, Mario Grilli, Fabio Sebastiani, 1989-06-01
