

A Greek scholar Eratosthenes was the first to coin the term Geography derived from the two Greek words i.e. 'Geo' means earth and 'graphy' means description. Geography is thus a description of earth's surface and the entire phenomenon appearing on it.

What is Geography?

- A science that deals with the description, distribution and interaction of the diverse physical, biological and cultural features of the earth's surface.
- Geography is the study of Earth's physical features and environment including the impact of human activity on these factors and vice versa. The subject also encompasses the study of patterns of human population distribution, land use, resource availability and industries.

Scholars who study geography are known as geographers. These people engage themselves in the exciting task of exploring and studying the Earth's natural environment and human society.
