Anaphora Resolution and Text Retrieval Helene Schmolz, 2015-03-30. This book covers anaphora resolution for the English language from a linguistic and computational point of view. First a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors, a type which has never been investigated so far. Therefore the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval rules for resolving non-finite clause anaphors are established. Therefore this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise. Open Access. In July 2019 this volume was retroactively turned into an Open Access publication thanks to the support of the Fachinformationsdienst Linguistik <https://www.linguistik.de>.

Management in the Digital Age Annika Steiber, 2017-10-26 In this Springer Brief the author introduces how Chinese firms are successfully using their own variants of the Silicon Valley Approach to management The author begins the discussion by deliberating on the extent to which management models need to be re-invented A fundamentally new approach is then introduced which already exists and is proving itself in practice at some of Silicon Valley's most dynamic firms The author finds that the Chinese management models in comparison may be even more advanced If true this could have profound implications for managers everywhere The author acknowledges that no management model fails or succeeds every time Skeptics can point to big bureaucratic firms that continue to prosper as well as to radical innovators that have gone under This book brings to light the need that has emerged for a model that will give companies their best chances of thriving amid the VUCA whirlwind A combination of evidence and informed opinion indicates the old management model has run its course
