Supporting Time-Critical, Parallel, and Spatially Distributed Tasks Using Augmented Reality

Jannike Illing, 2025-05-15 Even in highly automated production environments some tasks such as bonding and assembly still rely on human adaptability. These tasks are often time critical, run in parallel, and are spatially distributed across multiple workstations. How can Augmented Reality (AR) help reduce complexity and support workers in managing these demanding processes? In this dissertation, manual manufacturing using bonding as a representative case is investigated, and it is explored how AR can assist in the execution of complex parallel and time critical tasks. Following a Human Centered Design (HCD) approach, the research is grounded in observations and expert interviews, leading to three central research questions: How can time critical parallel tasks be visualized within the field of view (FoV)? How can they be guided outside the FoV? How can users gain an overview of distributed tasks? Findings show that AR reduces task complexity, improves performance, and is preferred over traditional instructions. However, supporting more than two concurrent tasks increases cognitive load. For spatially distributed tasks, location-based AR cues alone are not sufficient; additional peripheral visual signals and spatially registered overviews are essential for effective support.

WHO compendium of innovative health technologies for low-resource settings 2024 World Health Organization, 2024-07-18 Access to appropriate, affordable, effective, and safe health technologies is paramount, especially in low resource settings where the burden of non-communicable diseases adds on to the infectious diseases. NCDs account for a staggering 74% of global deaths, with 86% of premature fatalities occurring in resource constrained regions. Cardiovascular diseases, cancers, chronic respiratory conditions, and diabetes collectively contribute to over 80% of these premature NCD related deaths. Addressing this challenge requires targeted interventions and innovative solutions tailored to LMICs. The 2024 Compendium of Innovative Health Technologies for low resource settings includes commercially available solutions and prototypes. This 7th edition showcases 21 technologies, each with a full assessment. It also includes updates for technologies previously featured in previous compendia editions. Assessments include clinical aspects, relation to WHO technical specifications, regulatory compliance, criteria on health technology assessment, and health technology management, local production viability, and intellectual property considerations. Beyond presenting these innovations, the Compendium serves as a catalyst for increased interaction among stakeholders: ministries of health, procurement officers, donors, developers, biomedical engineers, clinicians, and users. By providing evidence-based assessments and relevant information, it aims to drive use of innovative health technology and expand global access, particularly for low resource settings for populations in need.

Emergentist Approaches to Language Brian MacWhinney, Vera Kempe, Ping Li, Patricia J. Brooks, 2022-02-16 *Advances in the Internet of Things* Qusay F. Hassan, 2025-07-17 Many reports estimated that in 2024 the number of Internet of Things (IoT) devices exceeded 18 billion worldwide, with predictions suggesting that it could reach nearly 40 billion by 2033. Despite primarily being consumer devices, a growing number of them will find use in

industrial and enterprise applications This shows the significance of IoT and how it shapes the future However to realize its full potential we must address its emerging challenges and highlight recent applications advances and trends which is the focus of this book Security and privacy represent some of the key challenges IoT adopters face The severity of these issues is exacerbated by the growing number of IoT devices the expansion of Industry 4 0 and the emergence of Industry 5 0 and the significant increase in cybersecurity attacks Considering that ensuring security and privacy is crucial for the successful adoption of IoT this book dedicates several chapters to these areas This book also introduces some novel models that improve IoT environments and presents several practical implementations that utilize IoT to demonstrate some of its real world applications Furthermore it examines several emerging technologies that enable the realization of advanced IoT environments We see most IoT advances in three main areas the integration of artificial intelligence machine learning network technologies and hardware design Therefore this book dedicates several chapters to these areas Most chapters touch on artificial intelligence machine learning emphasizing the significance of these technologies in today s and next generation applications The main objective of this book is to capture the state of the art in IoT and explore some of its emerging challenges solutions and technologies This peer reviewed book serves as a reference for researchers academics practitioners and graduate level students
