Water Everywhere!

Earth has lots of water! Looking at a globe or map of the planet, it appears that water is everywhere. Oceanic water up to 3,600 million km³ of the world's surface. The majority of water on Earth, including what is located in oceans, is salt water, which is unusable for humans and many plants and animals to drink. It contains too much salt and makes things very sick. If swallowed, salt water can even result in death. Only freshwater (the specific adaptations are for it) and brackish water can be used.
