Republican Europe Anna Kocharov,2017-06-01 Constitutional orders constitute political communities and international orders deriving from them by managing conflicts that threaten peace This book explores how a European political community can be advanced through EU constitutional law The constitutional role of the Union is to ensure peace by addressing two types of conflict The first are static conflicts of interests between the national polities in the EU These are avoided by ensuring reciprocal non interference between Member States in the Union through deregulation in Union law The second are dynamic conflicts of ideas about positive liberty held by the peoples of Europe These can be resolved through regulation in a European political space Here EU law enables a continuous process of re negotiating a shared European idea of positive liberty that can be accepted as its own by each national polity in the EU These solutions to the two types of conflicts correspond to the liberal and republican models for Europe The claim of this book is that the constitutional design of Europe presents both liberal and republican features Taking an innovative approach which draws on arguments from substantive law constitutional theory case law analysis insights from psychology and philosophy it identifies how best to strengthen the Union through constitutional law Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest

Place in Place Attachment Alexander C. Diener, Joshua Hagen, 2023-02-28 This book provides geographical perspectives on the complex and multifaceted relationship between people and their lived environments. Scholars with varied regional theoretical and topical specialties offer chapters that explore different aspects of a phenomenon so pervasive that no conception of social or political action can afford to ignore it. In the process of spatial organization and differentiation, people develop emotional attachments to specific places as well as people, objects and practices associated with those places. Place attachments thereby shape everyday routines, e.g. routes to work, shopping, social interactions, major life choices, e.g. places of residence, education and vacations, and identities, e.g. civic, national and religious. These attachments occur across multiple scales, from personal dwellings to community, region and homeland. It is our hope that this book reveals synergies between geography and other disciplines engaging with place attachment whilst invigorating research on the topic. **The Power of Place in Place Attachment** will be of great value to researchers and scholars of geography, identity, mobility and urban landscape change. The chapters in this book were originally published as a special issue of *Geographical Review*. **Framing**

Community Disaster Resilience Hugh Deeming, Maureen Fordham, Christian Kuhlicke, Lydia Pedoth, Stefan Schneiderbauer, Cheney Shreve, 2019-01-29 An essential guide to the foundations, research and practices of community disaster resilience. **Framing Community Disaster Resilience** offers a guide to the theories, research and approaches for addressing the complexity of community resilience towards hazardous events or disasters. The text draws on the activities and achievements of the project **emBRACE: Building Resilience Amongst Communities in Europe**. The authors identify the key dimensions of resilience across a range of disciplines and domains and present an analysis of community characteristics, networks, behaviour and practices in specific test cases. The text contains an in-depth exploration of five test cases whose communities are facing impacts triggered by different hazards: namely river floods in Germany, earthquakes in Turkey, landslides in South Tyrol, Italy, heat waves in London and combined fluvial and pluvial floods in Northumberland and Cumbria. The authors examine the data and indicators of past events in order to assess current situations and to tackle the dynamics of community resilience. In addition, they put the focus on empirical analysis to explore the resilience concept and to test the usage of indicators for describing community resilience. This important text merges the forces of research, knowledge, networking and practices in order to understand community disaster resilience. Contains the results of the acclaimed project **Building Resilience Amongst Communities in Europe**. **emBRACE** explores the key dimensions of community resilience. Includes five illustrative case studies from European communities that face various hazards. Written for undergraduate students, postgraduates and researchers of social science and policymakers. **Framing Community Disaster Resilience** reports on the findings of an important study to reveal the most effective approaches to enhancing community resilience. The **emBRACE** research received funding from the European Community's Seventh Framework Programme (FP7) 2007-2013 under grant agreement n° 283201.
