In response to globalization and advances in science and technology, American firms are demanding workers with greater proficiency in literacy and numeracy as well as strong interpersonal, technical, and problem-solving skills. However, employer surveys and industry and government reports have raised concerns that the nation may not have an adequate supply of skilled technical workers to achieve its competitiveness and economic growth objectives. In response to the broader need for policy information and advice, *Building America's Skilled Technical Workforce* examines the coverage, effectiveness, flexibility, and coordination of the policies and various programs that prepare Americans for skilled technical jobs. This report provides action-oriented recommendations for improving the American system of technical education, training, and certification.

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspeele, Luc Taerwe, Dan Frangopol, 2018-10-31 This volume contains the papers presented at IALCCE2018, the Sixth International Symposium on Life Cycle Civil Engineering, IALCCE2018, held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers, including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance, or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems. Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness, and resilience. Applications relate to buildings, bridges, and viaducts, highways, and runways, tunnels, and underground structures, offshore and marine structures, dams, and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference, a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting-edge information for anyone interested in life cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers, and representatives from local authorities.
