For two semester general chemistry courses. Bestselling author Nivaldo Tro has always believed the behavior of matter is determined by the properties of molecules and atoms to be the most important discovery in scientific knowledge. This idea is the entire organizing factor for his seminal new text *Chemistry: Structure and Properties*. Dr. Tro emphasizes the relationship between structure and properties, establishes a unique atoms-first approach to teaching chemistry by presenting atomic and bonding theories early in the text and stresses key themes throughout. The book is organized to present chemistry as a logical, cohesive story from the microscopic to the macroscopic so students can fully grasp the theories and framework behind the chemical facts. Every topic has been carefully crafted to illustrate that the relationship between structure and properties is the thread that weaves all of chemistry together. While developed independently of other Tro texts, *Chemistry: Structure and Properties* incorporates the author's vivid writing style, chemical rigor, dynamic multi-level images, and tested features. His consistent conceptual focus and step-by-step problem-solving framework encourages you to think through processes rather than simply memorize content. Interactive media within MasteringChemistry complements the book's problem-solving approach, thus creating a comprehensive program that enables you to learn both in and out of the classroom. This program presents a better teaching and learning experience for you.

Personalized learning with MasteringChemistry: This online homework tutorial and assessment program is designed to improve results by helping you quickly master concepts. You'll benefit from self-paced tutorials featuring specific wrong-answer feedback and hints that emulate the office-hour experience. Developed with a central theme and by a teaching community. As part of a community that teaches with the understanding that matter is composed of particles and the structure of those particles determines the properties of matter, Dr. Tro took great lengths in the text to ensure that everything from organization, art, and pedagogy reinforce this theme. The result of this emphasis is that the topic order has been constructed to make key connections earlier, stronger, and more often than the traditional approach. Linking conceptual understanding with problem-solving skills. Throughout each chapter, numerous Conceptual Connections

encourage comprehension of the most complex concepts while a consistent step by step framework in the worked examples allows you to think logically through the problem solving process Visualizing and understanding chemistry Revolutionary multipart images illustrate and reinforce the theme of the text and allows you to see and experience the molecules responsible for the structures and properties of matter 0321729730 9780321729736 Chemistry Structure and Properties Plus MasteringChemistry with eText Access Card Package Package consists of 0321834682 9780321834683 Chemistry Structure and Properties 0321934105 9780321934109 MasteringChemistry with Pearson eText ValuePack Access Card for Chemistry Structure and Properties Chemistry Nivaldo J.
