Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become

something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go Arts-Based Educational Research Narratives of Academic Identities Inbanathan Naicker,Daisy Pillay,Kathleen Pithouse-Morgan,Lungile Masinga,Theresa Chisanga,Anita Hiralaal,2024-09-12 This book delves into the complexities of being and becoming an academic in higher education Inspired by the arts the book introduces new voices and insights to scholarly discussions about what constitutes data and analysis in higher education research It demonstrates ABER s ability to shape and critique academic identity narratives in response to pressing problems and dilemmas in higher education The book includes exemplars from studies conducted primarily in South African contexts and led by South African researchers It explores diverse modes including collage digital artwork letter writing metaphor creative nonfiction and theatre making Contributions from expert scholars in Canada and the USA supplement this research and show how it has been enriched by critical transcontinental conversations The authors offer new perspectives on the entwined and complex relationship between the ABER narratives and identities **ECCWS 2019 18th European Conference on Cyber Warfare and Security** Tiago Cruz ,Paulo Simoes,2019-07-04 **Worldviews and Values in Higher Education** Madasu Bhaskara Rao,Abhilasha Singh,Pulaparthi Mallika Rao,2025-02-12 Worldviews and Values in Higher Education examines the profound influence these have in shaping institutional governance leadership and capacity building Integrating worldviews and values into institutional policies ensures that governance leadership and capacity building initiatives are coordinated and mutually supportive **Political Science in South Africa** Peter Vale,Pieter Fourie,2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies SAAPS and Politikon the South African Journal of Political Studies celebrate their 40th anniversary Also in April 2014 South Africa celebrates twenty years since the advent of the post Apartheid democracy and the birth of the rainbow nation This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this country Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities The fourteen contributions evaluate the state of the discipline s and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans understanding of their own polity as well as its place in the world The implications are uncomfortable and pose interesting challenges for South African scholarship pedagogy and national self reflection This book was published as a special issue of Politikon **Expanding Perspectives on Open Science: Communities, Cultures and Diversity in Concepts and Practices** L. Chan,F. Loizides,2017-06-20 Twenty one years ago the term electronic publishing promised all manner of potential that the Web and network technologies could bring to scholarly communication scientific research and technical

innovation Over the last two decades tremendous developments have indeed taken place across all of these domains One of the most important of these has been Open Science perhaps the most widely discussed topic in research communications today This book presents the proceedings of Elpub 2017 the 21st edition of the International Conference on Electronic Publishing held in Limassol Cyprus in June 2017 Continuing the tradition of bringing together academics publishers lecturers librarians developers entrepreneurs users and all other stakeholders interested in the issues surrounding electronic publishing this edition of the conference focuses on Open Science and the 27 research and practitioner papers and 1 poster included here reflect the results and ideas of researchers and practitioners with diverse backgrounds from all around the world with regard to this important subject Intended to generate discussion and debate on the potential and limitations of openness the book addresses the current challenges and opportunities in the ecosystem of Open Science and explores how to move forward in developing an inclusive system that will work for a much broader range of participants It will be of interest to all those concerned with electronic publishing and Open Science in particular
