How Modern Science Came into the World Floris Cohen, 2025-10-01 Once upon a time The Scientific Revolution of the 17th century was an innovative concept that inspired a stimulating narrative of how modern science came into the world Half a century later what we now know as the master narrative serves rather as a strait jacket so often events and contexts just fail to fit in No attempt has been made so far to replace the master narrative H Floris Cohen now comes up with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome Building forth on his earlier *The Scientific Revolution A Historiographical Inquiry* 1994 his new book takes the latest researches duly into account while connecting these in highly innovative ways It is meant throughout as a constructive effort to break up all too deeply frozen patterns of thinking about the history of science

**The Reality of It All** Ronnie Cohen, 2012-07-12 God Can the existence of God be scientifically explained and if so how important is God anyway Religion Whats it really all about and why do we need it Life Do we have a purpose and if so does it include finding the blueprint to finally unify the seven billion of us living on our planet Does this blueprint really exist Death Is death finality or is there a hereafter Do we really go somewhere and if so where Our soul Just what is our soul our spirit and what does it have to do with the reality of it all Proof Where is it If all of the above questions can be answered can those answers be proven The Reality of It All is extremely thoughtprovoking and somewhat controversial in that it tries to answer difficult questions that arise within most people at some time in their lives The answers as astounding as they may be hopefully will be inspiration enough to light the pathway for each of us to begin our own independent investigation of truth The reality of it all is that there are only two possibilities the ideas presented are either true or false Or put another way they are good and right for the advancement of individuals societies and civilizations or theyre not Truth once discovered is reality whether it is accepted or not Has the time come for all of us to find out the reality of it all
