Aging and the Macroeconomy National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population, 2013-01-10 The United States is in the midst of a major demographic shift In the coming decades people aged 65 and over will make up an increasingly large percentage of the population The ratio of people aged 65 to people aged 20 64 will rise by 80% This shift is happening for two reasons people are living longer and many couples are choosing to have fewer children and to have those children somewhat later in life The resulting demographic shift will present the nation with economic challenges both to absorb the costs and to leverage the benefits of an aging population

Aging and the Macroeconomy Long Term Implications of an Older Population presents the fundamental factors driving the aging of the U S population as well as its societal implications and likely long term macroeconomic effects in a global context The report finds that while population aging does not pose an insurmountable challenge to the nation it is imperative that sensible policies are implemented soon to allow companies and households to respond It offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape

The Physics of Reality Richard L. Amoroso, 2013 A truly Galilean class volume this book introduces a new method in theory formation completing the tools of epistemology It covers a broad spectrum of theoretical and mathematical physics by researchers from over 20 nations from four continents Like Vigier himself the Vigier symposia are noted for addressing avant garde cutting edge topics in contemporary physics Among the six proceedings honoring J P Vigier this is perhaps the most exciting one as several important breakthroughs are introduced for the first time The most interesting breakthrough in view of the recent NIST experimental violations of QED is a continuation of the pioneering work by Vigier on tight bound states in hydrogen The new experimental protocol described not only promises empirical proof of large scale extra dimensions in conjunction with avenues for testing string theory but also implies the birth of the field of unified field mechanics ushering in a new age of discovery Work on quantum computing redefines the qubit in a manner that the uncertainty principle may be routinely violated Other breakthroughs occur in the utility of quaternion algebra in extending our understanding of the nature of the fermionic singularity or point particle There are several other discoveries of equal magnitude making this volume a must

Community-based adaptation Hannah Reid, 2017-10-02 Community based adaptation CBA to climate change is based on local priorities needs knowledge and capacities Early CBA initiatives were generally implemented by non government organisations NGOs and operated primarily at the local level Many used bottom up participatory processes to identify the climate change problem and appropriate responses Small localised stand alone initiatives are insufficient to address the scale of challenges climate change will bring however The causes of vulnerability such as market or service access or good governance also often operate beyond the project level Larger organisations and national governments have therefore started to implement broader CBA programmes which provide opportunities to scale up responses and integrate CBA into higher levels of policy and planning This book shows that it is possible for CBA to remain centred on local priorities but not necessarily limited to work implemented at the local level Some chapters address the issue of mainstreaming CBA into government policy and planning processes or into city or sectoral level plans e g on agriculture Others look at how gender and children s issues should be mainstreamed into adaptation planning itself and others describe how tools can be applied and finance delivered for effective mainstreaming This book was published as a special issue of Climate and Development
