overview of the considerable amount of research conducted on various language learner differences until now Each chapter in this new volume focuses on a different individual difference variable Besides a review of the relevant second language literature Zolt n D nyei presents a concise overview of the psychological research involving each topic A key concern for the author has been to define the various learner factors as measurable constructs and therefore the discussion includes a summary of the most famous tests and questionnaires in each domain A wide range of readers will benefit from this book students in linguistics applied linguistics modern languages and psychology programs second language teachers participating in in service training courses and researchers in second language acquisition and psychology Catalog of Copyright Entries.
