Piping and Pipeline Calculations Manual J. Phillip Ellenberger, 2010 The integrity of a piping system depends on the considerations and principles used in design construction and maintenance of the system Piping systems are made of many components such as pipes flanges supports gaskets bolts valves strainers flexibles and expansion joints These components can be made in a variety of materials in different types and sizes and may be manufactured to common national standards or according a manufacturers proprietary item This book provides engineers and designers with a quick reference guide to the calculations codes and standards The lack of commentary or historical perspective regarding the codes and standards requirements for piping design and construction is an obstacle to the designer manufacturer fabricator supplier erector examiner inspector and owner who want to provide a safe and economical piping system An intensive manual this book will utilize hundreds of calculation and examples based on of 40 years of personal experiences of the author as both an engineer and instructor Each example demonstrates how the code and standard has been correctly and incorrectly applied This book is a no nonsense guide to the principle intentions of the codes or standards and provides advice on compliance After using this book the reader should come away with a clear understanding of how piping systems fail and what the code requires the designer manufacturer fabricator supplier erector examiner inspector and owner to do to prevent such failures The focus of the book is to enhance participants understanding and application of the spirit of the code or standard and form a plan for compliance The book is enhanced by a multitude of calculations to assist in problem solving directly applying the rules and equations for specific design and operating conditions to illustrate correct applications Each calculation is based on a specific code The major codes covered in the book are American Society of Mechanical Engineers B31 3 2002 Process
