Color for Science, Art and Technology Kurt Nassau,1997-12-18 The aim of this book is to assemble a series of chapters written by experts in their fields covering the basics of color and then some more In this way readers are supplied with almost anything they want to know about color outside their own area of expertise Thus the color measurement expert as well as the general reader can find here information on the perception causes and uses of color For the artist there are details on the causes measurement perception and reproduction of color Within each chapter authors were requested to indicate directions of future efforts where applicable One might reasonably expect that all would have been learned about color in the more than three hundred years since Newton established the fundamentals of color science This is not true because the measurement of color still has unresolved complexities Chapter 2 many of the fine details of color vision remain unknown Chapter 3 every few decades a new movement in art discovers original ways to use new pigments and dyes continue to be discovered Chapter 5 the philosophical approach to color has not yet crystallized Chapter 7 new pigments and dyes continue to be discovered Chapters 10 and 11 the study of the biological and therapeutic effects of color is still in its infancy Chapter 2 Color continues to develop towards maturity and the editor believes that there is much common ground between the sciences and the arts and that color is a major connecting bridge **The Cat Coloring Book** Karen Baldauski,1980 Forty splendid felines from the ubiquitous American shorthair to such exotic types as the Bombay Korat Sphynx hairless Ragdoll and Japanese Bobtail Handsome realistic renderings by Karen Baldauski capture the beauty elegance and grace of the cat in typical poses and activities Captions Introduction *The Elementary School Library Collection, Phases 1-2-3* ,1998
