Two Cheers for Higher Education Steven Brint, 2019-01-08 A leading expert challenges the prevailing gloomy outlook on higher education with solid evidence of its successes Crushing student debt rapidly eroding state funding faculty embroiled in speech controversies a higher education market disrupted by online competition today's headlines suggest that universities power to advance knowledge and shape American society is rapidly declining But Steven Brint a renowned analyst of academic institutions has tracked numerous trends demonstrating their vitality After a recent period that witnessed soaring student enrollment and ample research funding universities he argues are in a better position than ever before Focusing on the years 1980 2015 Brint details the trajectory of American universities which was influenced by evolving standards of disciplinary professionalism market driven partnerships especially with scientific and technological innovators outside the academy and the goal of social inclusion Conflicts arose academic entrepreneurs for example flouted their campus responsibilities and departments faced backlash over the hiring of scholars with nontraditional research agendas Nevertheless educators commitments to technological innovation and social diversity

prevailed and created a new dynamism Brint documents these successes along with the challenges that result from rapid change Today knowledge driven industries generate almost half of U S GDP but divisions by educational level split the American political order Students flock increasingly to fields connected to the power centers of American life and steer away from the liberal arts And opportunities for economic mobility are expanding even as academic expectations decline In describing how universities can meet such challenges head on especially in improving classroom learning Brint offers not only a clear eyed perspective on the current state of American higher education but also a pragmatically optimistic vision for the future

What works in early reading materials Ana Robledo,Amber Gove,2019-02-25 Access to books is key to learning to read and sustaining a love of reading Yet many low and middle income countries struggle to provide their students with reading materials of sufficient quality and quantity Since 2008 RTI International has provided technical assistance in early reading assessment and instruction to ministries of education in dozens of low and middle income countries The central objective of many of these programs has been to improve learning outcomes in particular reading for students in the early grades of primary school Under these programs RTI has partnered with ministry staff to produce and distribute evidence based instructional materials at a regional or national scale in quantities that increase the likelihood that children will have ample opportunities to practice reading skills and at a cost that can be sustained in the long term by the education system In this paper we seek to capture the practices RTI has developed and refined over the last decade particularly in response to the challenges inherent in contexts with high linguistic diversity and low operational capacity for producing and distributing instructional materials These practices constitute our approach to developing and producing instructional materials for early grade literacy We also touch upon effective planning for printing and distribution procurement but we do not consider the printing and distribution processes in depth in this paper We expect this volume will be useful for donors policymakers and practitioners interested in improving access to cost effective high quality teaching and learning materials for the early grades
