

Abstract: This study examines the impact of the 2008 financial crisis on the U.S. economy. The study uses a combination of qualitative and quantitative methods to analyze the effects of the crisis on various economic indicators, including GDP, unemployment, and consumer confidence. The results show that the crisis had a significant negative impact on the U.S. economy, leading to a sharp decline in GDP and a rise in unemployment. Consumer confidence also fell significantly, leading to a decrease in consumer spending. The study concludes that the crisis has had a long-term impact on the U.S. economy, and that further measures are needed to stimulate growth and reduce unemployment.
