Margo,2015-12-01 Marshaling an array of data Less Work for Less Pay shows rather than tells us why economic prosperity for America and other Western nations is now beyond the ability of central bankers and federal governments to accelerate through their creative stimulus actions Instead these measures often serve to delay the inevitable rebalancing of labor debt taxes and regulatory reform that is vital for greater economic competitiveness among these nations Multinational corporations figured this out years ago as they continue to aggressively pursue foreign markets and tax advantages in the world economy Meanwhile workers within Western economies are grudgingly adjusting to a world of contingency contract and part time employment as opportunities for permanent well paying jobs shrink Regrettably the United States and other developed nations remain obliviously stuck to antiquated labor debt and regulatory policies that fail to reflect the dynamic economic environment globalization and technology has created More optimistically remedies are offered to undertake many of the modern employment challenges neglected by current public policies **The Practitioner's Guide to POLCA** Rajan Suri,2018-04-09 POLCA Paired cell Overlapping Loops of Cards with Authorization is a card based visual control system that manages the flow of jobs through the shop floor at each operation it controls which job should be worked on next to meet delivery targets POLCA ensures that upstream operations use their capacity effectively by working on jobs that are needed downstream while at the same time preventing excessive work in process WIP build ups when bottlenecks appear unexpectedly POLCA is particularly suited to companies manufacturing high mix low volume and customized products Such companies struggle with long lead times late deliveries and daily expediting to meet delivery dates ERP systems are not designed to deal with this highly variable environment and add on software such as Finite Capacity Scheduling systems can require complex installation Also the Kanban system does not work well with low volume or custom production POLCA has delivered impressive results in such environments It does not require any complex software implementation it can be used without an ERP system or it can seamlessly complement an existing ERP system This book Provides a step by step roadmap on how to implement POLCA invaluable for both companies
