Gamification in

Higher Education Sierra Adare-Tasiwoopa ápi, Nathan Silva, 2023-10-30 Gamification in Higher Education is a user friendly text for anyone curious about gamification and how it increases student engagement This book presents actual examples from gamified college courses furnishing strategies and detailed plans for integrating gamification regardless of the subject area discipline or modality Moreover the step by step how to aspects of gamification that do not require expensive proprietary gaming software set this book apart from others in the field Gamification in Higher Education explores ways to incorporate real world simulations and promote critical thinking skill while focusing on storytelling through which to draw in students and help them get into the game both literally and figuratively Additionally the book examines gamification research and how it can be used to support reluctant learners who normally struggle with complex course content The authors share their experiences with what has worked and more importantly what has not worked in adding gamification to their courses This key resource offers educators a practical guide that will take instructors step by step through the design development and implementation of game elements games and fully gamified courses without using costly specialized software Its conversational tone endeavors to put educators whether novice mid career or veteran at ease with the process of gamification

Biology, 1999 *Learning Animals* Nadine Dolby, 2022-03-15 We are surrounded by thousands of animals alive and dead They are an intimate and ever present part of our human lives As a society we privilege veterinarians as experts on these animals they are our educators and teachers in what they say what they do and the decisions that they make Yet within the field of education there is little research on the curriculum pedagogy and experiences of veterinary school and students What do veterinarians learn in veterinary school How do their experiences during those four years shape their perceptions of animals How do the structures curriculum and pedagogy of veterinary college create and influence these experiences Learning Animals opens up this conversation through an exploration of the complicated fascinating and often painful stories of a cohort of veterinary students as they make their four year journey from matriculation through graduation The book examines how the experiences of veterinary students shape how humans relate to animals from public policy and decision making about the environment and animals slaughtered for food to the most personal decisions about euthanizing companion animals The first full length critical qualitative study of the perspectives of our primary teachers about animals this will be a thought provoking read for those in the fields of both educational research and veterinary education
