Aaron Sequeira,2023-06-29 We will focus on the most outstanding technologies for modern electronic music production Therefore as in the previous book in which sections made the presentation of the instruments this volume is made up of five of them for reasons of analytical practicality 1 Audio recording and playback 2 Speakers 3 Communication protocols between electronic instruments 4 Modern electronic music production 5 DJing The first point will clarify how the ability to record sound in an analog mechanism was acquired just a moment ago if we compare that time with human existence Therefore since electronic music is intrinsically linked to the technique of sound recording and its playback it is necessary to know about the technologies that have allowed this process since the 19th century Subsequently it will be explained what the speakers are and how their role and development in electronic music have been fundamental As has already been elucidated throughout this series it would be practically impossible for electronic music to exist without speakers After that we ll see the two main protocols of communication between electronic instruments MIDI and OSC in addition to expressing my point of view about their transcendence because never in the history of music in its entirety the instruments had managed to sync through messages and time automation codes under the master slave concept Understanding the above we will review all those technologies that facilitate modern electronic music production such as a DAW sound effects sample manipulation etc Finally we will explain the tools that the DJ uses to play such as turntables CD players controllers etc Since each invention of these five points has its own story I will limit myself to mentioning merely basic details so that the reader can investigate more for his account topic by topic As in the case of this series first and second volumes the purpose is to establish a conceptual axis in which one can have a reference not a detailed encyclopedia of each specific device *CHI ...
