4. **What is the main purpose of the text?**
The text is a news report about a new study on the effects of a certain drug on the brain.
5. **What is the main finding of the study?**
The study found that the drug significantly reduced the activity of the brain's reward system.
6. **What is the significance of this finding?**
This finding suggests that the drug may be effective in treating addiction.
7. **What are the limitations of the study?**
The study was conducted on a small group of people and only in the laboratory setting.
8. **What are the implications of the study?**
The study implies that the drug may be a potential treatment for addiction.
9. **What is the next step in the research?**
The next step is to conduct a larger clinical trial to test the drug's effectiveness in a real-world setting.
10. **What is the conclusion of the study?**
The study concludes that the drug has the potential to be a useful treatment for addiction.

RESEARCH DESIGN

1. **What is the purpose of the study?**
The purpose of the study is to determine the effect of the use of a computer-based simulation on the learning of the concepts of the cell and the organelles of the cell.

2. **What is the research question?**
The research question is: What is the effect of the use of a computer-based simulation on the learning of the concepts of the cell and the organelles of the cell?

3. **What is the hypothesis?**
The hypothesis is: The use of a computer-based simulation will have a positive effect on the learning of the concepts of the cell and the organelles of the cell.

4. **What is the independent variable?**
The independent variable is the use of a computer-based simulation.

5. **What is the dependent variable?**
The dependent variable is the learning of the concepts of the cell and the organelles of the cell.

6. **What is the control group?**
The control group is the group of students who did not use the computer-based simulation.

7. **What is the experimental group?**
The experimental group is the group of students who used the computer-based simulation.

8. **What is the data collection method?**
The data collection method is a pre-test and post-test design.

9. **What is the data analysis method?**
The data analysis method is a t-test.

10. **What is the conclusion?**
The conclusion is: The use of a computer-based simulation has a positive effect on the learning of the concepts of the cell and the organelles of the cell.
