

1 Introduction – PRINCE2

1.1 The PRINCE2 Training Manual

The official PRINCE2 manual for the Project Manager is called **"Managing Successful Projects with PRINCE2"**; this is an excellent reference manual. The manual is designed for:

- Experienced Project Managers who want to learn PRINCE2
- Project Managers who want to have a reference manual for PRINCE2

This **PRINCE2 Foundation Training Manual** is different from the official PRINCE2 manual in the following ways:

- It is focused on the Foundation exam syllabus
- It is much more of a training manual and less of a reference manual.
- PRINCE2 terms are explained with examples, which makes it easier to understand.
- Manual is written in plain English so that you understand it the first time you read it.
- A lot of management documents examples are provided and we will continue to add more.
- A project timeline overview has been provided to help understand how a project is divided.
- Questions at the end of each chapter provide a good way to test your knowledge.
- Available in PDF format (easier to search and find the information you are looking for)

To summarize, if you want to learn PRINCE2 and prepare for the PRINCE2 Foundation Exam, then use this **PRINCE2 Foundation training manual** and if you want a very good reference manual then use the official PRINCE2 manual **"Managing Successful Projects with PRINCE2"**.

1.2 What are Projects?

Projects are seen as a way to introduce change, hence they are unique by nature, i.e., two identical projects are never done. Now some of you may be thinking that in your company the same projects keep repeating. Well, if they are exactly the same, then these are referred to as processes; and processes that repeat are referred to as "business as usual" or operations.

Let us start with a more general definition of a project. I got this from Wikipedia.

A project is a unique series of actions designed to accomplish a unique goal within specific time and cost limitations.

I like this definition, as it is concise and easy to understand. It mentions terms like "series of actions," "unique goal" and "within the constraints of time and money."

Another definition of a project is as follows:

A project is a temporary endeavour undertaken to create a unique product or service.

This might sound like something from Star Trek but it is actually from the Project Management Body of Knowledge (PMBOK®).

Now let us hear what PRINCE2 says about what a project is. This is a quote from the manual:

*"A project is a **temporary organization** that is created for the purpose of delivering one or more business products according to an agreed Business Case."*

You may not have understood this, as you need to know a little more about PRINCE2 first. It should start to make more sense in a few minutes after I start explaining what is meant by the words like *temporary organization* and *unique*, which appear in the definition.

The word **organization** refers to the project team, the persons involved in the project and how they relate to each other. Each project has a definite start and end, so it is **temporary**. Remember, projects that go on forever are referred to as "operations" or "business as usual" and are not projects (e.g., maintenance of a software application).

Business Case is one of the documents that exists in a PRINCE2 project. It includes information such as the reasons for the project, the benefits, costs and time information and ROI calculation.

Poster Final OVERVIEW The Army will replace the Army Physical Fitness Test APFT with the Army Combat Fitness Test
ACFT as the physical fitness test of record beginning in FY21 To accomplish this the ACFT will be implemented in three
phases Phase 1 Initial Operating Capability IOC includes a limited user Field Test with approximately 60 battalion sized units
from across all components of the Army While the ACFT is backed by thorough scientific research and has undergone several
revisions there are still details that have not been finalized The ACFT requires a testing site with a two mile run course and a
flat field space approximately 40 x 40 meters The field space should be grass well maintained and cut or artificial turf that is
generally flat and free of debris While maintaining testing standards and requirements commanders will make adjustments
for local conditions when necessary The start and finish point for the two mile run course must be in close proximity to the
Leg Tuck station When test events are conducted indoors the surface must be artificial turf only Wood and rubberized
surfaces are not authorized as they impact the speed of the Sprint Drag Carry When environmental conditions prohibit
outdoor testing an indoor track may be used for the 2 Mile Run The Test OIC or NCOIC are responsible to inspect and certify
the site and determine the number of testing lanes There should not be more than 4 Soldiers per testing group for the SPT
HRP and SDC The OIC or NCOIC must add additional lanes or move Soldiers to a later testing session to ensure no more
than 4 Soldiers per testing group Concerns related to Soldiers graders or commanders will be addressed prior to test day The
number of lanes varies by number of Soldiers testing A 16 lane ACFT site will have the following ACFT specific test
equipment requirements 16 hexagon trap bars 60 pounds each with a set of locking collars While all NSN approved hexagon
bars must weigh 60 pounds there is always a small manufacturer s production tolerance The approved weight tolerance for
the hexagon bar is 2 pounds 58 62 pounds Weight tolerance for the hexagon bar and therefore the 3 Repetition Maximum
Deadlift does not include the collars On average hexagon bar collars weigh 2 0 pounds per pair and are considered incidental
to the totalweight of the MDL weight Approximately 3 000 lbs of bumper plates 16 x 10 lb medicine ball 16 x nylon sled with
pull straps 32 x 40 lb kettle bells Permanent or mobile pull up bars 16 x pull up bars at approximately 7 5 feet off the ground
