Pseudoscience Allison B. Kaufman, James C. Kaufman, 2019-03-12 Case studies, personal accounts and analysis show how to recognize and combat pseudoscience in a post truth world. In a post truth, fake news world we are particularly susceptible to the claims of pseudoscience. When emotions and opinions are more widely disseminated than scientific findings and self proclaimed experts get their expertise from Google, how can the average person distinguish real science from fake? This book examines pseudoscience from a variety of perspectives through case studies, analysis and personal accounts that show how to recognize pseudoscience, why it is so widely accepted and how to advocate for real science. Contributors examine the basics of pseudoscience including issues of cognitive bias, the costs of pseudoscience with accounts of naturopathy and logical fallacies in the anti vaccination movement, perceptions of scientific soundness, the mainstream presence of integrative medicine, hypnosis and parapsychology and the use of case studies and new media in science advocacy. Primary Health Care And Complementary And Integrative Medicine: Practice And Research Jon Adams, Parker Magin, Alex Broom, 2013-06-25 Complementary and integrative medicine (CIM) has become big business. Alongside the increased consumption of complementary medicine and the swelling numbers of complementary health practitioners, has emerged a growing interest in these medicines and therapies from within the ranks of conventional primary health care. At the level of practice and beyond, a culture of confrontation and antagonism has begun to be replaced by a focus upon potential integration, collaboration and common ground. With these significant developments in mind, this ground breaking book is a valuable and timely addition to the CIM and primary health

care research literature The collection outlines the core issues challenges and opportunities facing the CIM primary health care interface and its study and will provide insight and inspiration for those practising studying and researching the contemporary relations between CIM and primary health care The book is the first to be authored by leading international CIM primary health care researchers from diverse disciplines and backgrounds including health social science statistics qualitative methodology general practice clinical trials design clinical pharmacology health services research and public health All contributors are active CIM primary health care researchers and their extensive research and practice experience helps lend a unique immediacy and richness to the contributions and collection
