Allan, 2014-03-26 Psychopathology at School provides a timely response to concerns about the rising numbers of children whose behaviour is recognised and understood as a medicalised condition rather than simply as poor behaviour caused by other factors It is the first scholarly analysis of psychopathology which draws on the philosophers Foucault Deleuze Guattari and Arendt to examine the processes whereby children's behaviour is pathologised The heightened attention to mental disorders is contrasted with education practices in the early and mid to late twentieth century and the emergence of a new

conceptualization of childhood is explored Taking education as a central component to the contemporary experience of growing up the book charts the ways in which mental disorders have become commonplace in childhood and youth from birth through to college and university but also offers examples of where professionals have refused to pathologise children's behaviour The book examines the extent of the influence of psychopathology on the lives of children and young people as well as the practices that infiltrate education and the possibilities for alternative educational responses that negate the diagnosis of mental disorder Psychopathology at School is a must read for anyone concerned about the growing influence of psychopathology in education and will be of particular interest to educated readers and to scholars students and professionals in education psychiatry psychology child studies youth studies nursing social work and sociology

Birth of a New Earth Adrian Parr, 2017-10-24 In response to unprecedented environmental degradation activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth The environmental movement has undeniably influenced even its adversaries as the language of sustainability can be found in corporate mission statements government policy and national security agendas However the price of success has been compromise prompting soul searching and questioning of the politics of environmentalism Is it a revolutionary movement that opposes the current system Or is it reformist changing the system by working within it In Birth of a New Earth Adrian Parr argues that this is a false

choice calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination Parr insists that environmental destruction is at its core a problem of democratization and decolonization It requires reckoning with militarism market fundamentalism and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence Birth of a New Earth locates the emancipatory work of environmental politics in solidarities that can bring together different constituencies fusing opposing political strategies and paradigms by working both inside and outside the prevailing system She discusses experiments in food sovereignty collaborative natural resource management and public interest design initiatives that test new models of economic democratization Ultimately Parr proclaims environmental politics is the refusal to surrender life to the violence of global capitalism corporate governance and militarism This defiance can serve as the source for the birth of a new earth
