Pioneer Engineering's patented "X" outrigger design gives the crane operator something not previously available in the 50 year history of this industry... full stability over the sides, back, and most important, over the front of the crane... and the outriggers never leave the ground. Pioneer achieves this full degree "work sure" without a fourth transporter outrigger. With Pioneer, you need just one crane to get maximum work ability!

Pioneer Engineering utilizes the "X" outrigger design and goes one step further. Instead of just 175 degrees of rotation, Pioneer gives the operator a full 500 degree boom rotation. This truly allows working over the front of the unit with 22° compromise. Compared to other manufacturers, Pioneer gives you full stability and total access to the job site. It's a high combination to beat.
