

The separate front seats are individually adjustable through a 10° range. To adjust the seats, pull up on the seat adjustment handles, located under the front center console of the seats, and move the seats to the desired position. In using the seat in any given position, be sure that the locking pin is correctly engaged.

To remove either of the front seats (the back seat is under the left and the battery is under the right), slide the seat all the way forward until it is against the stop, reach under and to the rear of the indicated seat track and locate the stop pin which protrudes through the bottom of the seat tube, depress this pin and slide the seat out forward until it is free of the track.

The rear seat area is readily converted to a cargo compartment by removing or folding the rear seat. To remove the seat, detach the cushions from the lower support rails, remove the support rails from the rear, slide the front cushions, and unlatch the back cushions and remove them from the upper support rails. If desired, the back cushions and covers can be folded forward into the luggage compartment instead of being removed completely.
