Mathematics Yiming Cao,Zsolt Lavicza ,Shuhua An,Lianchun Dong,2024-05-31 There is no doubt that the onset of a new decade has brought high expectations of academic progress for scholars especially for researchers in mathematics education The International Group for the Psychology of Mathematics Education was born in 1976 which focused on the international exchange of knowledge in the psychology of mathematics education the promotion of interdisciplinary research with psychologists mathematicians and mathematics teachers and the development of the psychological aspects of teaching and learning mathematics and its implications Researching Mathematics Classrooms Simon Goodchild,Lyn English,2002-12-30 Critique of research methods and methodology is one of several key features of the regular dialogue between researchers This critique takes place formally at conferences and seminars and regularly in universities Published critique is normally separated from the original work This book brings together the writing of researcher and independent critique Thus the book exposes to wider scrutiny the dialogue that exists between researchers It will be of interest to all who are concerned to understand the nature and substance of this critique The volume comprises a collection of accounts of classroom studies each complemented by the reaction of an eminent researcher The accounts and reactions are written to expose the nature of methodology of classroom research It argues that methodology encompasses the choice of methods and the researchers beliefs and values **Essentials of Research Methods for Educators** Anastasia Kitsantas,Timothy J. Cleary,Maria K. DiBenedetto,Suzanne E. Hiller,2024-02-16 Essentials of Research Methods for Educators is a comprehensive resource designed for future educational professionals It provides an in depth overview of data literacy and research methods using concrete examples for better understanding The book covers qualitative quantitative and mixed methods research and offers a highly scaffolded approach making research projects manageable Psychology and Mathematics Education Gila Hanna,Laura Macchi,Karin Binder,Laura Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program

In Simon's bounded rationality and its direct descendant ecological rationality, rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content-free norms of coherence e.g. transitivity

Literacy, Culture and Development Daniel A. Wagner, 1993 Literacy is thought to be one of the primary cultural transmitters of information and beliefs within any society where it exists Yet when considered as a social phenomenon literacy is remarkably difficult to define because its functions meanings and methods of learning vary from one cultural group to the next This book compares and contrasts our understanding of literacy and its acquisition and retention It addresses major debates in education policy today such as the importance of mother tongue literacy programs the notion of literacy relapse and the concept of educational poverty The author focuses on Moroccan children whose parents are unschooled whose language is often different from that used in the classroom and whose first instruction often involves rote religious teaching
