A. General Information

Project Title:	ENERGY MANAGEMENT PLAN
Project Description:	This project will result in development of an Energy Management Plan (EMP) that will provide strategic direction for OWASA's energy management, energy efficiency, and renewable energy decisions, actions, and investments.
Project Purpose:	<p>OWASA uses more than 100 billion BTUs of energy each year to operate the community's water, sewer, and reclaimed water systems, and to run related support facilities, vehicles, and equipment. (Our energy use is equivalent to the total annual amount of energy used by more than 1,000 homes.) Most of the energy we use is in the form of electricity, which powers the many motors and pumps we use to move water and wastewater around, and to run blowers that provide air required in our treatment processes. We recognize the importance of controlling our energy costs, and being efficient in our use of energy.</p> <p>The EMP will document our goals and objectives (including targets) and ongoing strategies for: managing and conserving energy and related costs; increasing energy security and reliability; using renewable energy; and reducing our greenhouse gas emissions (GHGs). (As background, Attachment A provides a summary of electricity and natural gas use across our major functional areas for Fiscal Years 2007 through 2014.)</p> <p>Value Added to OWASA and our Customers: The proposed EMP will be OWASA's first formal, comprehensive energy management plan. It will serve as a single point of reference for information about our energy management program goals and objectives, selected strategies, and implementation plan. Our customers will benefit from cost-effective energy efficiency actions and returns on investments.</p> <p>Aligns With Strategic Plan: Preparation of the EMP is Strategic Initiative #5 of OWASA's Strategic Plan for Fiscal Years 2014-2017. This project also complements the proposed development of a Water Conservation Plan, which is a goal in Strategic Initiative #1 of the Strategic Plan.</p> <p>Benefits to Be Realized: Through preparation of the EMP, we will select the most cost-effective and practical energy management, energy efficiency, and renewable energy strategies for meeting our goals and objectives.</p>

IT Project Health Checks Sanjiv Purba, 2022-05-02

Project or program health checks provide tremendous value to businesses and pay for themselves by multiples of magnitude. No matter how well a project or program is performing, there are always activities that can provide better value, reduce costs, or introduce more innovation. IT project and program health checks can help organizations reach their goals and dramatically improve Return on Investment (ROI). IT Project Health Checks: Driving Successful Implementation and Multiples of Business Value offers a proven approach for evaluating IT projects or programs in order to determine how they are performing and how the eventual outcome for the initiative is currently trending. The project or program health checks provide a set of techniques that produce actionable recommendations that can be applied for any combination of the following outcomes:

- Drive more business and technical value from a program.
- Set a project or program back on track for successful implementation as defined by executive management.
- Rescue a program that is heading towards failure.
- Act as additional insurance for initiatives that are too important to fail.
- Protect executive careers by creating transparency within the inner workings of complex initiatives.

The book shows how a review can quickly identify whether an initiative needs to be rescued, even when the project team is not aware that it is hurtling towards failure. It also provides techniques for driving business value even when a project team believes it's been stretched as much as possible. Other outcomes covered in this book include:

- Objectively develop a project Health Check Scorecard that establishes how well a project is doing and the direction it is headed.
- Demonstrate how to drive business value from an IT program regardless of how well or badly it is tracking.
- Provide surgical advice to improve a project's outcome.
- How to use the many templates and sample deliverables to get a quick start on your own health check.

Designed to provide significant value to any member of a project team, program team, stakeholders, sponsors, business users, system integrators, trainers, and IT professionals, this book can help find opportunities to drive multiples of business value and exceed project success metrics.
