Performance Management at Universities Poul Erik Mouritzen, Niels Opstrup, 2019-07-01 Mouritzen and Opstrup's book is a most welcome addition to the subject of the management of academic performance It is certainly well worth reading and considering Bruno S Frey Permanent Visiting Professor at the University of Basel and Research Director CREMA Center for Research in Economics Management and the Arts Switzerland Performance Management at Universities could not possibly be more timely With universities and university faculty throughout the world being pressed to give more evidence and more precise indicators about their productivity this thoughtful contribution provides a much needed and unusually thoughtful analysis of the possibilities and pitfalls found in current approaches to university performance evaluation Given policy makers and politicians calls for evidence based management and evaluation let us hope that policy makers heed their own rhetoric and act on the evidence provided here The authors show that performance measures while sometimes beneficial are subject to gaming and manipulation and that more precision does not necessarily equate with better performance but rather altered performance This superb book should be read by anyone interested higher education evaluation as well as by those who are subjected to it Barry Bozeman Regents Professor Arizona Centennial Professor of Technology Policy and Public Management School of Public Affairs Arizona State University USA In Performance Management at Universities Mouritzen and Opstrup definitively answer the question What are the effects of national university performance based funding schemes that use bibliometric indicators As these schemes have proliferated the question has become urgent The authors marshal comprehensive data on the Danish university system to sift through the many predictions commonly made by academics newly subject to these systems to identify what actually happened to Danish research as the system took hold Diana Hicks Professor School of Public Policy Georgia Institute of Technology USA and first author on the Leiden Manifesto on research metrics This book gives an account of what can happen when performance management is introduced at universities How do scholars for better or worse respond to a system which counts the number of articles and books Many myths exist about scholar's reactions They cheat slice their production to the least publishable unit become more risk averse and will go for the low hanging fruits in short they develop a taste for publication at the cost of a taste of science Systematic knowledge about the consequences of such systems for the motivation behavior and productivity of university scholars is in short supply The book is a major contribution to remedy this situation Education at a Glance 2017 OECD Indicators OECD, 2017-09-12

From a war torn and famine plagued country at the beginning of the 1990s Ethiopia is today emerging as one of the fastest growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle income country by 2025 and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development where the state plays a central role and where a successful industrialization drive has challenged the long held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post 1991 economic development policy and strategy the analysis is set against the background of the long history of Ethiopia and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg regime between 1974 and 1991 and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints this volume is a key reference work on the economy of Ethiopia.

Leanse, Claudia Maria Trombetta, 2023-05-08. **Dramatic Global Population Growth Embraces the Growing Older Population** Edward A McKinney, 2018-11-16. The world is witnessing a dramatic demographic population growth explosion across all age groups that had its beginning around the early 1800s when the first billion people in population was recorded. Most importantly has been an increasing growth in the older population. Does population aging matter in the twenty first century? Yes it matters because as research has pointed out the increasing older population globally will have a significant impact on all essential societal systems: the family, pensions and retirement and financial institutions as well as medical health and social systems. This growth explosion or phenomenon will affect all continents, countries and regions regardless of economic, political and military power. Causative factors for this global growth in population have come about primarily as a result of medical advances, innovations, agricultural development and the industrial revolution, especially the development of railways, seaways and highways. A major emphasis of the book focuses on several very important factors: the growing older population as aforementioned, especially its impact on all of essential societal systems and the subject of ageism. Ageism becomes extremely important considering that the growing older population, the silver tsunami, represents the new majority. This new

majority will no longer be ignored Gerontologists for years have attempted to call attention to the fact Expectations for old people are based on negative age stereotypes Members of American society generally expect and even encourage the aged to be asexual intellectually rigid unproductive ineffective and disengaged Seniors are supposed to stay out of the way sit in their rocking chairs and enjoy the golden years They are expected to be inactive invisible but happy Levin J and Levin W Ageism Prejudice and Discrimination Against the Elderly California Wadsworth Publishing 1941 pp 97 98 Speaking of being ignored why aren't more members of the older population involved at the decision making tables in shaping a society for all ages After all they would bring years of experiences skills knowledge and values for creating a society for all ages in the twenty first century with justice and human rights for all Currently there is a global movement with a goal of the eradication of ageism in all of its forms Some will recall from several decades ago the Grey Panther Movement in America with a similar mission of the eradication of all injustices at the time being experienced by the older population The current movement says The time is now not later One major social injustice being experienced by the growing old population globally is the lack of income security in old age including the lack of access to other essential services such as medical health and social including long term care More than 50 percent 51 percent of older persons globally do not have basic income security or a social pension in retirement A more alarming statistic is that in Sub Saharan Africa forty seven countries eight two percent 82.5 of retirees do not have a social pension Yes for the older population the time is now for correcting the aforementioned injustices Maybe what is needed is a human seismic force comprising the new majority to initiate a social movement with a goal of the eradication of all forms of ageism and ensuring that the growing older population will live in dignity and respect in later life including social protection pensions **OECD Economic Surveys: China 2017**

Poverty Greg Thompson,Anna Hogan,2024-12-04 As teacher shortages reach a global crisis point this book explores how time poverty has become a critical factor in the working lives of teachers and school leaders Arguing that we need to move away from framing the problem of teachers work as simply workload this book suggests that understanding time poverty is the first step in moving toward more manageable working lives The book brings together international perspectives on teacher time poverty drawing on theoretical and empirical work to underscore the growing complexity of teachers work and how this impacts job satisfaction stress and feeling that there is never enough time to accomplish all that needs to be done Many policy solutions misdiagnose the problems of teachers work simply suggesting it is an issue of workload The chapters investigate issues of work intensification finding that teachers are not only working longer but also working harder as they manage more complex classrooms and policy mandates This book is essential reading for those interested in understanding how current education policy both produces time poverty and could better identify and respond to the complexities of teachers work
