Name _____ Per _____

Circle the molecule below: Circle the ring carbon in the structure.

Part A: Three atom investigation

1. Click the "Keep the box" button adjacent to the three atoms and click the "Electrostatic Potential" button.
2. Change the electronegativity of **A** and **B** to the electronegativity of atom **B**. Observe the color, partial charges and bond structure. Write the following information: the electronegativity of atom B (use the top of the page) _____
 partial charges _____
 bond structure _____
3. Now put the electronegativity of A and B into the electronegativity of B and observe the results. Fill in the following information:
 - a. The polarity arrow points to the _____ electronegative atom.
 - b. The partial positive charge is always on the _____ electronegative atom.
 - c. The larger the electronegativity difference, the _____ the bond structure.

Part B: Three atom investigation

1. Change the electronegativity of atom A and B to the electronegativity of **A** and **C**. Observe the color, partial charges, molecular dipole and partial charges.
 - a. Draw the molecular dipole on the Lewis dot diagram.
 - b. In a different color, describe partial molecular dipole on the diagram.
 - c. Draw the partial charge symbols on the Lewis dot diagram.
 - d. Circle the electronegative. Add other electronegative the molecule - for example.
2. Click the "Keep the box" button. Change the electronegativity of **A** and **B** to the electronegativity of **A** and **C**. Observe the color, partial charges and partial charges.
 - a. Draw the molecular dipole on the Lewis dot diagram.
 - b. In a different color, describe partial molecular dipole on the diagram.
 - c. Draw the partial charge symbols on the Lewis dot diagram.
 - d. Circle the electronegative. Add other electronegative the molecule - for example.

Auditory Brainstem Evoked Potentials Ananthanarayan Krishnan, 2021-10-06 *Auditory Brainstem Evoked Potentials Clinical and Research Applications* provides a solid foundation of the theoretical principles of auditory evoked potentials. This understanding is important for both the development of optimal clinical test strategies and interpretation of test results. Developed for graduate level audiology students, this comprehensive text aims to build a fundamental understanding of auditory evoked brainstem responses ABR and their relationship to normal and impaired auditory function as well as its various audiologic and neurotologic applications. In addition to covering the classical onset ABR, the book provides a thorough review of sustained brainstem responses elicited by complex sounds including auditory steady state response ASSR, envelope following response EFR, and frequency following response FFR, and the growing clinical and research applications of these responses. By exploring why certain stimulus manipulations are required to answer specific clinical questions, the author provides the resources needed for students and clinicians to make reasoned decisions about the optimal protocol to use in a given situation. **Key Features:** A full chapter devoted to laboratory exercises. Numerous illustrations to help explain key concepts. Description of neural bases underlying amplitude and latency changes. Troubleshooting techniques. End of chapter summaries.

Hormonal Regulation of Development II T.K. Scott, 2012-12-06 This is the second of the set of three volumes in the *Encyclopedia of Plant Physiology New Series* that will cover the area of the hormonal regulation of plant growth and development. The overall plan for the set assumes that this area of plant physiology is sufficiently mature for a review of current knowledge to be organized in terms of unifying principles and processes. Reviews in the past have generally treated each class of hormone individually, but this set of volumes is subdivided according to the properties common to all classes. Such an organization permits the examination of the hypothesis that differing classes of hormones acting according to common principles are determinants of processes and phases in plant development. Also in keeping with this theme, a plant hormone is defined as a compound with the properties held in common by the native members of the recognized classes of hormone. Current knowledge of the hormonal regulation of plant development is grouped so that the three volumes consider advancing levels of organizational complexity: viz. molecular and subcellular, cells, tissues, organs, and the plant as an organized whole, and the plant in relation to its environment.
