SNOWMOBILE SERVICE MANUAL

Foreword

This manual is designed primarily for use by snowmobile service technicians in a properly equipped shop. Since a certain knowledge of mechanical theory, tool use, and shop procedures is necessary to perform the service work safely, all operations should be performed by qualified service personnel only. In order to perform the work efficiently and prevent costly errors, the technician should read the text, thoroughly familiarizing him/herself with procedures before starting the work. Cleanliness of parts and tools as well as the work area is of primary importance.

This manual includes procedures for maintenance operations, component identification and unit repair, along with service specifications for 1996 model Polaris snowmobiles. The section index tabs enable the user to quickly locate the section desired. A table of contents is placed at the beginning of each chapter to aid the user in locating general areas of information. The alphabetic index at the end of the manual will help the user find specific information quickly. Keep this manual available for reference in the shop area.

To keep this manual current it is important that it is updated yearly with new model information and specifications.

At the time of publication all information contained in this manual was technically correct. However, all materials and specifications are subject to change without notice.

Comments or suggestions about this manual may be directed to: Engineering Services, Technical Writer, Polaris Industries Inc., 301 5th Ave. S.W., Roseau, MN 56751, or call (218) 463-2312.
