Topic: LIGHT

Light:

Light is the electromagnetic radiation with wavelengths between 380 and 700 nm which is visible to the human eye.

Or

The form of energy that makes it possible to see things: the brightness produced by the sun, by fire, by a lamp, etc.

Light is an electromagnetic wave. Light shows dual nature i.e. wave and particle.

Normal

- Normal is defined as the perpendicular that is drawn to the reflecting surface.
- In the following fig., the dotted line represents the normal.
- Normal is always drawn at the point of incidence.

Angle of incidence

The angle formed between the normal and the incident ray at the point of incidence is called the angle of incidence.

The angle of incidence is shown i° in the figure.

Angle of Reflection

The angle formed between the normal and the reflected ray at the point of incidence is called the angle of reflection.

The angle of reflection is shown r° in the figure.

Reflection of light

Reflection of light occurs when the waves encounter a surface or other boundary that does not absorb the energy of the radiation and bounces the waves away from the surface.

Law of reflection

The law of reflection states that the angle of reflection equals the angle of incidence— $\theta_r = \theta_i$.

The angles are measured relative to the perpendicular to the surface at the point where the ray strikes the surface.

Image formation by a plane mirror

Two rays emerge from point P , strike the mirror, and reflect into the observer's eye. Note that we use the law of reflection to construct the reflected rays. If the reflected rays are extended backward behind the mirror (see dashed lines in Figure), they seem to originate from point Q .

This is where the image of point P is located. If we repeat this process for point P' , we obtain its image at point Q' . You should convince yourself by using basic geometry that the image height (the distance from Q to Q') is the same as the object height (the distance from P to P'). By forming images of all points of the object, we obtain an upright image of the object behind the mirror.
