Performance Auditing of Public Sector Property Contracts Lori Keating, 2016-05-13 PPP/PFI contracts often share a number of features: they run over a very long period of time; they are conceived without a complete understanding of how requirements may change; and despite the rhetoric, they tend to create a context where dispute and litigation rather than partnership are the norm. In this environment, effective auditing is essential to ensure that projects are delivering what the end user requires. Audits are both a public sector right and a matter of good management sense. **Performance Auditing of Public Sector Property Contracts** is a practical guide to performance auditing for public sector property managers with a series of guidelines for auditors of public sector property contracts. The book concentrates on Facilities Management contracts. Lori Keating explains the basis for the process, how to retain balance, independence and rigour, and how to audit intangible performance measures and other tricky areas. The book follows an audit process from commencement to conclusion and contains a discussion of factors that contribute to the success of any audit. It is essential reading for public sector auditors, PPP project managers and contractors.
