Child Development and Education Teresa M. McDevitt, Jeanne Ellis Ormrod, Glenn Cupit, Margaret Chandler, Valarie Aloa, 2012-08-21 Child Development and Education is a comprehensive child development text written especially for educators. It helps students to translate developmental theories into practical implications for teaching and caring for youngsters with diverse backgrounds, characteristics, and needs. The text draws from innumerable theoretical concepts, research studies conducted around the world, and the authors' own experiences as parents, teachers, psychologists, and researchers to identify strategies for promoting young people's physical, cognitive, and social/emotional growth. In this Australian edition, contemporary Australian and New Zealand research has been highlighted, and local educational structures, philosophies, and controversies have been reflected. McAdams, 2008-12-22 Drawing on cutting edge scientific research, classic personality theories, and stirring examples from biography and literature, *The Person* presents a lively and integrative introduction to the science of personality psychology. Author Dan McAdams organizes the field according to a broad conceptual perspective that has emerged in personality psychology over the past 10 years. According to this perspective, personality is made up of three levels of psychological individuality: dispositional traits, characteristic adaptations such as motives and goals, and integrative life stories. Traits, adaptations, and stories comprise the three most recognizable variations on psychological human nature, grounded in the human evolutionary heritage and situated in cultural and historical context. The fifth edition of this beautifully written text expands and updates research on the neuroscience of personality traits and introduces new material on personality disorders, evolution, and religion, attachment in adulthood, continuity and change in personality over the life course, and the development of narrative identity.
